(54) Title: PORTABLE ULTRAFILTRATION DEVICE

(51) Int.Cl.2016.01: A 61M 1/34

(57) Abstract: The invention relates to a portable ultrafiltration device comprising a suction bellows (9) connected by means of a tube (8), passing through a solenoid valve (10), to one of the dialysate connectors of a hemofilter (1) incorporated into a blood circuit made up of arterial lines (2), extending from a vascular access (4) and passing through a peristaltic pump (5), and venous lines (3) passing through an electronic safety block (6) and connecting to the vascular access (4), while the other dialysate connector is connected to an ultrafiltration pressure sensor (7). The peristaltic pump (5), the electronic safety block (6), the ultrafiltration pressure sensor (7) and the solenoid valve (10) are connected and controlled by means of an intelligent central unit (11) powered by a rechargeable battery. The patient's blood flows through the blood circuit and the negative pressure generated by the suction bellows (10) is transmitted through the connection tube (8) and causes the ultrafiltration of the blood through the fibres of the hemofilter (1). In this way, liquid collects in the space surrounding the fibres and in the suction bellows (9) until the space is completely full. As the suction bellows (9) fills, the negative pressure exerted thereby decreases to zero and subsequently increases slowly until it reaches the level of the pressure in the blood contained in the fibres. At that moment, the ultrafiltration stops and the central unit (11) indicates to the user that the treatment is finished by means of a visual or audible alarm. The blood is returned to the patient by means of the infusion of an isotonic physiological solution. The hemofilter (1) and the suction bellows (10) are then removed from the device.

(51) 2016.01: E 04H 17/02
(57)

Disclosed in the present invention is a shamba grassland fencing comprising fencing fabrics that is made of hot dip galvanized wires to form the fence fabric made by wrapping cross wires to line wires at right angles to form a rectangular mesh. Both low tensile and high tensile wires can be used to manufacture the fabric. It is characterized by line wires and cross wires intersecting at right angles to form a rectangular mesh. At the point of intersection, the cross wires are wrapped around the line wire to form a strong joint. The spacing of the line wires does not follow a regular pattern like the other fencing fabrics. From the design calculations, a spacing of 6x75mm, 10x100mm and 3x150mm was arrived at to produce a high strength, low cost and light weight fence fabric

11.6 Removal

Section 23 of the Trade Marks Act provides that registration of a trade mark in Kenya shall expire after a period of **ten (10) years**. The Act also provides that the proprietor of a registered trade mark may make an application for renewal of the trade mark upon completion of the prescribed Form TM 10 and payment of the prescribed renewal fee.

Rule 65 of the Trade Mark Rules provides that where no application for renewal of a registered trade mark is received upon expiry of the ten year period, the Registrar of Trade Marks shall notify the proprietor of this fact. Where no application for renewal of the registered trade mark is received within a period of **sixty (60) days** from the date of the notice for renewal by the Registrar, rule 67 of the Trade Mark Rules requires the Registrar of Trade Marks to publish this fact.

In accordance with the above provisions, the Registrar of Trade Marks hereby notifies the public that the proprietors of the trade marks indicated below were duly notified and that they did not file applications for renewal of their respective trade marks.

In accordance with the provisions of rules 67 and 68 of the Trade Mark Rules, the public is hereby notified as follows:

- (a) Where the proprietor of a registered trade mark makes an application for renewal of a mark that has been published herein and pays the renewal fee together with the additional prescribed late renewal fee **within thirty (30) days** from the date of this publication, the trade mark shall be renewed and shall not be removed from the Register of Trade Marks;
- (b) Where no application for renewal of a trade mark published herein is received **within thirty (30) days** from the date of this publication, the trade mark shall be forthwith removed from the Register of Trade Marks; and

Once the trade mark is removed from the Register of Trade Marks, the proprietor may thereafter make an application for renewal of the mark upon payment of the prescribed renewal fee together with the additional prescribed restoration fee. The trade mark shall then be restored to the Register of Trade Marks upon the Registrar of Trade Marks being satisfied that it is just to do so and upon imposing such conditions as the Registrar may deem fit.
