(51) Int.Cl.:

(57) Abstract: Disclosed is a system for collecting, subdividing and recognizing snails, the system includes an offline system and an online system, the offline system includes image labeling and snail recognition model development, the snail recognition model includes data collection, data labeling, model construction, and model training and optimization. Based on the image recognition technology of the deep convolutional neural network, a precise recognition system for the intermediate host snails of parasites and their similar snails in a natural scene are proposed. Combined with the snail image database and encyclopedia knowledge base, a mobile phone APP's parasite intermediate host snail intelligent identification system is developed. The system runs on a mobile phone, which is portable and low in cost. It solves the problem that the prior art cannot automatically subdivide and identify the snails, provides an important reference for the highquality snail search of frontline snail investigators, and provides convenience for the general public to quickly identify the intermediate host of parasite snails.

(57) Abstract: Disclosed are a sidebar interaction method, a device and a computer readable storage medium. The method includes: receiving an instruction to initiate an interaction, generating an interaction module on a currently operating interface of a front-end application, outputting at least one notification message in the interaction module; initiating a back-end application, displaying a sidebar in a first target display area on the currently operating interface; and detecting a preset operation corresponding to the sidebar and responding to the preset operation. The sidebar interaction module is arranged, and notification message interception is carried out through the sidebar interaction module, so that the interference is reduced when different applications or different functions of the same application interact. The sidebar interaction is more reasonable. The sidebar for auxiliary application is displayed on the operating interface, improving the perception a user's perception to a third-party program corresponding to the auxiliary function.

(54) Title: GRASSLAND FENCE
(57) Disclosed in the present invention is a shamba grassland fencing comprising fencing fabrics that is made of hot dip galvanized wires to form the fence fabric made by wrapping cross wires to line wires at right angles to form a rectangular mesh. Both low tensile and high tensile wires can be used to manufacture the fabric. It is characterized by line wires and cross wires intersecting at right angles to form a rectangular mesh. At the point of intersection, the cross wires are wrapped around the line wire to form a strong joint. The spacing of the line wires does not follow a regular pattern like the other fencing fabrics. From the design calculations, a spacing of 6x75mm, 10x100mm and 3x150mm was arrived at to produce a high strength, low cost and light weight fence fabric

9.6 Removal

Section 23 of the Trade Marks Act provides that registration of a trade mark in Kenya shall expire after a period of **ten (10) years**. The Act also provides that the proprietor of a registered trade mark may make an application for renewal of the trade mark upon completion of the prescribed Form TM 10 and payment of the prescribed renewal fee.

Rule 65 of the Trade Mark Rules provides that where no application for renewal of a registered trade mark is received upon expiry of the ten year period, the Registrar of Trade Marks shall notify the proprietor of this fact. Where no application for renewal of the registered trade mark is received within a period of **sixty (60) days** from the date of the notice for renewal by the Registrar, rule 67 of the Trade Mark Rules requires the Registrar of Trade Marks to publish this fact.

In accordance with the above provisions, the Registrar of Trade Marks hereby notifies the public that the proprietors of the trade marks indicated below were duly notified and that they did not file applications for renewal of their respective trade marks.

In accordance with the provisions of rules 67 and 68 of the Trade Mark Rules, the public is hereby notified as follows:

- (a) Where the proprietor of a registered trade mark makes an application for renewal of a mark that has been published herein and pays the renewal fee together with the additional prescribed late renewal fee **within thirty (30) days** from the date of this publication, the trade mark shall be renewed and shall not be removed from the Register of Trade Marks;
- (b) Where no application for renewal of a trade mark published herein is received **within thirty (30) days** from the date of this publication, the trade mark shall be forthwith removed from the Register of Trade Marks; and

Once the trade mark is removed from the Register of Trade Marks, the proprietor may thereafter make an application for renewal of the mark upon payment of the prescribed renewal fee together with the additional prescribed restoration fee. The trade mark shall then be restored to the Register of Trade Marks upon the Registrar of Trade Marks being satisfied that it is just to do so and upon imposing such conditions as the Registrar may deem fit.
