1.1 National Application

(21) Application no.: KE/P/2023/4404 (22) Filing Date: 10/02/2023(30) Priority: (51) Int.Cl.2018.01 G 06Q 30/06(2012.01)(54) Title: A CLICKABLE PAY AND SHIP LINK TO A PACKAGED SALES TRANSACTION WRAPPER AUTO GENERATION SYSTEM AND NO-CODE ONLINE PLATFORM WHICH ALLOWS ANYONE TO SELL PRODUCTS GLOBALLY(72) Inventors: CHRIS FOLAYAN(73) Applicant(s): INTERSWITCH EAST AFRICA (KENYA) LIMITED P. O. BOX 2649-00100 NAIROBI, Kenya (74) Agent: , (57) A clickable pay and ship link to a packaged sales transaction wrapper auto generation system that is configured to wrap up all visual, informational, and financial elements of a particular sales transaction by a user selection of a no-code online clickable link platform which allows anyone to sell products globally is disclosed. The clickable link is provided by the clickable pay and ship link to a packaged sales transaction wrapper auto generation system platform to allow anyone to sell globally with one link that can be used and posted anywhere in the world, thereby ensuring everyone has the ability to sell globally

O. BOX 80000-80100 MOMBASA, Kenya (74) Agent: (57) The invention provides a method for upcycling waste glass bottles into a moldable composite material. The process includes sorting, crushing, sieving, washing, drying the glass particles, and mixing them with a chemical resin solution. The composite material is molded into various objects and cured under an oxidizing atmosphere. The process enables the manufacture of products such as sanitary fittings, furniture, lighting systems, artistic works, and automotive parts, promoting environmental sustainability while reducing manufacturing costs

The system incorporates a unique identifier, such as a QR code barcode, or alphanumeric code on each product units packaging. concealed by a tamper-evident cover, which can be either scratch-off ink or a secure label. upon removal of the cover by the consumer, the identifier is revealed. allowing verification through mobile app, website or text entry. The system also integrates a loyalty program, which rewards consumers upon successful authentication with points, discounts, or access to promotional offers. This packaging solution deters counterfeiting by making the packaging non-reusable once opened, ensuring that only genuine products reach the consumer. Additionally, an encrypted database may track distribution and authentication events, providing enhanced security and brand control. The invention is applicable across multiple industries, including pharmaceuticals, cosmetics, electronics, and luxury goods, offering a versatile solution for product verification and customer retention

O. BOX 5107-00200 CITY SQUARE NAIROBI, Kenya (74) Agent: , (57) The present invention discloses an ice water dispenser powered by a 550W solar photovoltaic panel mounted on support poles anchored with a solar elevation system for optimal energy capture. The solar energy is stored in a 48V, 200Ah battery, ensuring uninterrupted operation even during low sunlight conditions. The device comprises a stainless steel reservoir equipped with a refill valve for easy water input, a cooling system utilizing a compressor and a 10% propylene glycol mixture to achieve and maintain temperatures as low as -20°C, and a temperature controller for precise cooling management. Visual indicators provide real-time feedback on the cooling process, with distinct signals for "cooling in progress" and "cooling stop." The invention further includes color-coded hoses-blue for charging and red for discharge-to facilitate intuitive water management. Enclosed in a corrosion-resistant stainless steel housing, this invention provides

a durable, sustainable, and efficient solution for dispensing chilled water in remote or off-grid environments.

BOX 1933 KERICHO, Kenya (74) Agent: (57) The present invention relates to a purple tea concentrate made from a blend of purple tea, Roselle botanicals (Hibiscus flowers), and still water. The concentrate provides a convenient, ready-to-use beverage that preserves the health benefits of purple tea, including its rich anthocyanin content, while offering a palatable and refreshing flavor. The purple tea concentrate is produced by carefully blending natural purple tea leaves with dried Roselle botanicals and still water, which are steeped at a controlled temperature, cooled, and stabilized to create a stable, easily consumable product. This concentrate offers a simple, convenient solution for enjoying purple tea, making it more accessible and enjoyable for consumers while retaining its antioxidant and health-promoting properties.

The system features a solar panel that charges an integrated battery, ensuring consistent operation even in low-light conditions. A motion sensor detects movement from birds and humans, activating a rotating chain mechanism. This chain strikes a metal plate, generating sound to effectively deter birds and alert homeowners or storekeepers of potential security breaches. This innovative and sustainable design provides an eco-friendly, low-maintenance solution for crop protection and enhanced security.P.O.BOX 1125-30100,ELDORET

The squared infusion bag is sachet comprising a flat rectangle chamber 33B made of plastic or compostable filter material with a cotton thread extension 34, sewn knot 36 and tag 37 as shown in FIG. 13C. Also disclosed is a preparation method comprising special drying method, dosing, sterile packaging and extending shelf-life options. The soluble infusion delivers stimulation effect with minimal side effects. The infusion product is used for producing stimulating infusion that replaces the practice of chewing Khat to achieve the required sufficient threshold. The infused product can be consumed in beverages, juice, food, medicine and water.

The method comprises isolation and selection of an effective and competitive functional Rhizobia indigenous for a specific soil-plant system. Microbial strains will be recovered from their natural habitats usually from the bulk soil, rhizosphere or root nodules. This is followed by characterization of the selected Rhizobia on optimized growth medium and fermentation process parameters based on the suitability of the chosen strain will also be examined by a number of in vitro tests, such as growth on particular conditions and quantification of effectiveness.

The DES formulations comprise choline chloride and urea as the hydrogen bond donor and acceptor, respectively. The hydrogen bonding of DES, along with its acidity, facilitates the dissolution and fibrillation of lignocellulose from water hyacinth to form a viscous slurry. This slurry can be cast into various materials. The DES can be recovered and reused multiple times. Characterization techniques and performance evaluations have been conducted on the extracted lignocellulose.

This invention relates to a multifunctional steam treatment device comprising a mixer, a heating chamber, a treatment chamber, and a biogas plant. The device is applicable in the treatment of greenhouse soils, fish feed, and pelleted organic manure. The mixer ensures homogeneous blending of materials before steam treatment, which is critical for process efficiency and quality outcomes. This invention falls within the technical field of agriculture, particularly agricultural production machinery. From an industrial perspective, mixers are essential for feed producers to ensure uniform feed formulations. In greenhouse operations, the steam treatment device can be used to sterilize soil, effectively eliminating pathogens without the use of chemicals. Additionally, the steam-producing unit can serve a humidification function, making it suitable for moistening greenhouses and even indoor spaces during hot or dry season

This comprehensive solution manages and treats slaughterhouse waste effectively and converts it into organic fertilizer. The system reduces emission of greenhouse gases from slaughterhouse waste management. The process begins with collection of diverse slaughterhouse waste components, including blood, urine, rumen, and offal, via a specially designed extrusion channel within the slaughterhouse. This channel, composed of concrete and PVC pipes, guides the waste through a sequence of chambers, ensuring the purity of the waste intended for treatment. At the core of this innovation are microbes preparation tanks, housing a blend of biological enzymes and microbes from Effective Microorganism (EM), further enhanced with waste fruit juices and jaggery. This fosters accelerated waste breakdown within an anaerobic tank environment, maintaining temperatures between 30 to 45 degrees Celsius. Central to the invention's success are specially designed underground tanks, capable of retaining waste materials for a predetermined duration and volume, ensuring optimal waste degradation. Furthermore, an adaptable design using flat PVC bladder tanks laid on the ground harnesses solar heat for accelerated decomposition while preserving an anaerobic environment. The innovation incorporates an intricate monitoring and control mechanism, ensuring effective waste treatment. Each treatment tank is equipped with airtight covers, enabling ongoing observation, introduction of microbial agents as needed, and regulation of the tank's internal environment. A specialized breather apparatus monitors microbial activity, offering real-time insights into the waste breakdown process. A distinctive aspect of this invention is its capacity to transform waste into organic fertilizer, rigorously tested for quality and nutrient content. This environmentally friendly alternative to synthetic fertilizers underscores the effectiveness of this novel paradigm in slaughterhouse waste management. This invention has the potential to revolutionize waste management practices in slaughterhouses, building upon the existing body of knowledge in the field.

The storage system includes a plurality of rails or tracks (22a, 22b) arranged in a grid pattern (14) above the stacks of containers. The grid pattern comprises a plurality of grid spaces and each stack is located within a footprint of only a single grid space. The load handling device is configured to move laterally on the rails or tracks above the stacks. The load-handling device includes a container-receiving space (114) located above the rails or tracks in use and a lifting device (104) arranged to lift a container from a stack into the

container-receiving space. The load handling device has a footprint that, in use, occupies only a single grid space in the storage system.

In this way, any subsequent Resume attempts by the UE (10) will derive new security keys from the old keys, which means that the keys and security context will be the same for each attempt. In this way, the security context in the UE (10) will remain synchronized with the network security context, regardless of how many attempts the UE (10) has performed (assuming the network does not change the security context when the Resume procedure fails). Alternatively, the UE (10) may store the new security context it derives during the first Resume attempt, and then ensure that it is reused at subsequent Resume attempts.

The process includes the steps of adjusting the pH of the AMD to be in the range of 3 to 5; adding maghemite nanoparticles to form a slurry; and a) aerating the slurry obtained in step 3), or b) simultaneously heating and mixing the slurry obtained in step 3). Thereafter maghemite nanoparticles loaded with one or more metals and sulphate and precipitated metals is separated from the slurry.

preceding entropy slice at a neighboring part thereof. Thereby, the probability estimations used in entropy coding are adapted to the actual symbol statistics more closely, thereby lowering the coding efficiency decrease normally caused by lower-delay concepts. Temporal interrelationships are exploited additionally or alternatively.

The method comprises: step 1, performing non-linear pre-equalization on G3-PLC baseband data to obtain pre-equalized data; step 2, converting the pre-equalized data into an analog signal, and sending same to a local channel non-linear response module, so as to obtain a transmission signal; step 3, converting the transmission signal into a digital signal, sending same to a non-linear pre-equalization coefficient calculation module, and calculating a pre-equalization coefficient according to the digital signal and the pre-equalized data; and step 4, feeding back the pre-equalization coefficient to a non-linear pre-equalization implementation module, so as to obtain a non-linear pre-equalization response. By means of the method, on the basis of pre-equalization of local feedback at a transmission end, the quality of a signal received by a receiving end can be greatly improved, such that the success rate of the decoding by the receiving end can be improved.

The can integrates advanced thermocore insulation with a heat exchanger system, utilizing a chilled glycol-water mixture to maintain the desired temperature, effectively preserving milk during transit without the need for external refrigeration. It features a secure, spill-proof lid (101) with a rubber seal (102) for leak prevention and contamination protection. The can also incorporates ergonomic transport features, including adjustable padded straps for easy handling. These elements combine to provide a durable, sustainable, and cost-effective solution for milk transport in off- grid, rural, and urban environments. The thermocore-insulated can (100) offers an environmentally friendly alternative to traditional refrigeration, ensuring that milk remains fresh and safe during long-distance transport in various settings.

The process involves thermal decomposition through dehydration, de polymerization, and carbonization, yielding nanoparticle pigments. The pigments are then incorporated into eco-friendly formulations using natural waxes, oils, or liquid carriers. The invention falls under IPC

classifications B09B 3/00, C09C 1/48, and Y02W 30/64 due to its contribution to waste recycling and climate mitigation. It promotes sustainable product development by transforming waste into valuable black pigments.

The container is constructed from UV-stabilized reflective geomembrane with integrated tier-specific irrigation control through tee connectors providing flood-and-drain functionality. The geometric design features open top-to-base circle diameter ratio of approximately 1:5 and slant angle $< 63^\circ$ to improve natural lighting uniformity and reduce shading effect for upright growing plants. A central truncated column and substrate selection alongside a large base area to ameliorate the tendency of over consolidation and compaction of the substrate. The system supports both single-unit and modular installations for scalable applications with enhanced plant biomass uniformity and life span

The feed leverages the unique nutritional properties of these ingredients to deliver a high-protein, energy-rich, and nutrient-dense formula tailored for poultry. BSF larvae are a sustainable protein source, containing up to 60% crude protein and essential amino acids. They are environmentally friendly and cost-efficient as they can be farmed using organic waste. Amaranth, a superfood, is rich in lysine, calcium, and iron, providing critical micronutrients that enhance poultry health and productivity. Sorghum, a drought-tolerant cereal crop, serves as a low-cost energy source comparable to maize, ensuring affordability and availability in arid and semi-arid regions. This sustainable feed formulation addresses key challenges in poultry farming, including high feed costs and the environmental impact of traditional feed ingredients such as fishmeal and soybean. This technology offers a practical solution to the rising demand for affordable, high-quality poultry feed, ensuring food security and economic empowerment for poultry farmers globally.

It integrates IoT-enabled key cabinets, multi-factor authentication, centralized access control, real-time tracking, and audit logging to automate the issuance and return of keys within organizational environments. The system supports remote administration, real-time alerts, compliance with international data protection standards, and integration with existing security infrastructure. It is adaptable for use in sectors such as healthcare, logistics, education, government, and hospitality.

The method involves selecting and cleaning the gemstone fragment and arranging them within a metal bezel made of sterling silver plated with rhodium or 18 karat gold. A transparent jewellery grade adhesive is applied to bond the gemstones in place followed by curing at room temperature or wild heat. The process allows creation of visually appealing and durable items such as rings pendants earrings and bracelets without the need for faceting or specialized tools. It is well suited for artisan based production in low resource setting and promotes sustainable use of gemstone by products while supporting local economic empowerment especially for communities engaged in small scale mining and artisanal activities

The invention integrates an Arduino-based microcontroller with soil moisture and humidity sensors to enable automated irrigation and environmental monitoring. The system is configured to deliver water and nutrients precisely based on real-time environmental conditions, thereby improving water use efficiency and promoting healthy seedling development. The hydroponic setup eliminates reliance on soil, thereby enhancing root growth and increasing seedling survival rates under challenging environmental conditions. The invention further provides a low-cost, scalable, and adaptable solution suitable for reforestation, agroforestry, urban greening, and climate-smart agriculture initiatives.

(51) H 04M 3/42(2006.01), H 04R 29/00(2006.01) (57) The invention relates to a post call audio content playback system designed to enhance user interaction within mobile telecommunications networks. The system enables mobile subscribers to receive personalized audio content such as music, advertisements, motivational clips or radio streams immediately after a phone call ends. Accessible via both USSD and web interfaces, users can register, select and subscribe to audio content using a mobile phone. Upon detecting a call termination event, the system automatically triggers the playback of the user selected content either to the caller, the callee or based on custom preferences. The system integrates modules for user authentication, content storage, call event monitoring, playback activation and payment processing through mobile money or airtime deduction. A backend dashboard supports administrative functions, providing analytics on user engagement, audio usage and revenue. This innovation transforms the traditionally passive post call moment into a monetizable and content rich experience, thereby extending service provider engagement beyond standard voice communication.

The synergistic combination of these active ingredients provides effective pest control against a wide range of insects such as flies, mosquitoes and other related insects such as arthropods encountered in domestic, commercial, agricultural, horticultural, animal dwelling spaces and relevant environments. The formulation is designed for convenient and precise application using pressurized containers equipped with valve systems for controlled release. The broad-spectrum activity, long-lasting residual effectiveness, and emphasis on safety and environmental sustainability and offers valuable solutions for integrated pest management across various sectors.

Traditional plastic seedling trays contribute significantly to pollution, while this method provides a sustainable alternative by utilizing coconut husks, an abundant and renewable resource. The process involves preparing coconut coir fibers, which are heated and compressed into molds at specific temperatures and pressures. This yields sturdy pots that nurture seedlings without restricting root growth, supporting healthy plant development. Key components include steel or aluminum molds with heating elements and temperature controls, a thin layer of biodegradable natural glue for binding, and a hydraulic press that applies pressure to shape the fibers. The resulting coir pots are durable for seedling growth, plantable directly into soil, and decompose overtime, enriching the soil and promoting environmentally sustainable agricultural practices.

The formulation is prepared by extracting

bioactive compounds from each plant, standardizing the extracts, and combining them in specific proportions to achieve synergistic therapeutic effects. The resulting formulation can be administered orally or topically to manage or prevent various health conditions, such as infections, inflammatory disorders, oxidative stress, immune deficiencies, and metabolic dysfunctions. Designed as a safe and effective natural alternative, the formulation meets pharmaceutical standards for quality and consistency and supports sustainable use of African medicinal plants. Applications span pharmaceuticals, nutraceuticals, cosmetics, veterinary health, and sustainable agriculture, providing a holistic and standardized approach to health and wellness.

It enables patients to securely and efficiently initiate medical service requests, transmit health-related data, and establish real-time communication with healthcare professionals. The system comprises user-facing communication terminals integrated with biometric and health sensors, a secure operating environment, and a backend coordination platform. The system supports multi-channel communication (text, audio, video), contract lifecycle management for temporary staffing (locums), and real-time service matching using patient location and provider availability. HMCS is deployable in residential, clinical, and mobile healthcare environments to facilitate rapid response, continuity of care, and scalable service delivery.

Backpack(57) The invention discloses a wearable digital billboard backpack that integrates an electronic display with the functional structure of a backpack. The device consists of a backpack body fitted with a rear-facing LED or LCD display panel, a rechargeable and replaceable battery pack, wireless communication modules including Wi-Fi, Bluetooth, and SIM card technology, and an integrated webcam camera. The screen supports multimedia formats for video (MPEG-3, MPEG-4, MPEG-5, H.264, H.265, MAV, AVS) and images (JPG, JPEG, BMP, PNG, GIF), and may be manufactured with touch or non-touch functionality. The backpack is available in waterproof and non-waterproof versions, ensuring adaptability for both indoor and outdoor usage. In addition to its advertising functions, the backpack provides conventional storage compartments for personal items, thereby combining practicality with digital advertising capability.

8.0 INDUSTRIAL DESIGN APPLICATIONS PUBLISHED UNDER SECTION 87 AND REGULATION 48

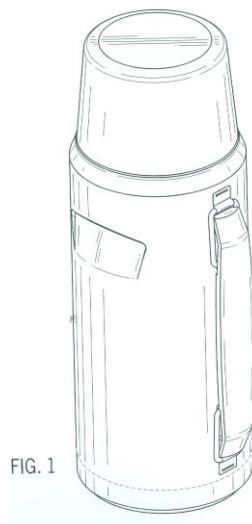

NOTICE is given that any person who has grounds of opposition to the Registration of any of the Industrial designs published herein may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form IP 36 (in duplicate) together with a fee of Ksh.5,000/= (local opponent) or US\$ 250 (foreign opponent).

The period of lodging the notice of opposition may be extended by the Managing Director as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Managing Director to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after reasonable notice has been given in writing to the applicant to afford him an opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant. Representations and samples of the designs advertised herein can be seen at the Patent Registry, Kenya Industrial Property Institute, KIPi Centre, 17 Kabarsiran Avenue, Off Waiyaki Way, Lavington, Nairobi.

11.0 TRADE MARKS

11.1 Applications accepted for registration

NOTICE is given that any person who has grounds of opposition to the Registration of any of the trade marks advertised herein according to these classes may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form TM. No. 6 (in duplicate) together with a fee of Ksh.5,000/= (local opponent) or US\$ 250 (foreign opponent). The period of lodging the notice of opposition may be extended by the Registrar as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Registrar to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after a reasonable notice has been given in writing to the applicant for registration to afford him any opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant.

Representations of the marks advertised herein can be seen at the Trade Marks Registry, Kenya Industrial Property Institute, KIPi Centre, Kabarsiran Avenue Off Waiyaki Way, Lavington, Nairobi.

11.9 REMOVAL

Section 23 of the Trade Marks Act provides that registration of a trade mark in Kenya shall expire after a period of ten (10) years. The Act also provides that the proprietor of a registered trade mark may make an application

for renewal of the trade mark upon completion of the prescribed Form TM 10 and payment of the prescribed renewal fee.

Rule 65 of the Trade Mark Rules provides that where no application for renewal of a registered trade mark is received upon expiry of the ten year period, the Registrar of Trade Marks shall notify the proprietor of this fact. Where no application for renewal of the registered trade mark is received within a period of **sixty (60) days** from the date of the notice for renewal by the Registrar, rule 67 of the Trade Mark Rules requires the Registrar of Trade Marks to publish this fact.

In accordance with the above provisions, the Registrar of Trade Marks hereby notifies the public that the proprietors of the trade marks indicated below were duly notified and that they did not file applications for renewal of their respective trade marks.

In accordance with the provisions of rules 67 and 68 of the Trade Mark Rules, the public is hereby notified as follows:

Where the proprietor of a registered trade mark makes an application for renewal of a mark that has been published herein and pays the renewal fee together with the additional prescribed late renewal fee **within thirty (30) days** from the date of this publication, the trade mark shall be renewed and shall not be removed from the Register of Trade Marks;

Where no application for renewal of a trade mark published herein is received **within thirty (30) days** from the date of this publication, the trade mark shall be forthwith removed from the Register of Trade Marks; and

Once the trade mark is removed from the Register of Trade Marks, the proprietor may thereafter make an application for renewal of the mark upon payment of the prescribed renewal fee together with the additional prescribed restoration fee. The trade mark shall then be restored to the Register of Trade Marks upon the Registrar of Trade Marks being satisfied that it is just to do so and upon imposing such conditions as the Registrar may deem fit.

11.10 MADRID APPLICATIONS ACCEPTED FOR REGISTRATION

The following are the marks whose international registration has been notified to Kenya as a designated contracting Party by the International Bureau, World Intellectual Property Organization (WIPO) and which are governed by the Madrid Agreement and the Madrid Protocol. The prescribed period of twelve (12) months and eighteen months (18) respectively for refusal of the marks commences from the notification date indicated herein for each mark.

NOTICE is given that any person who has grounds of opposition to the registration of any of the marks may, in accordance with the provisions of rule 11(1) of the Trade Marks (International Registration) Rules 2003, file a notice of opposition within sixty (60) days from the date of this Journal on form TM. No. 6 (in duplicate) together with a fee of Ksh 5,000/= (Kenyan residents) or US\$ 250 (non residents).

The period of filing the notice of opposition may be extended by the Registrar of Trade Marks as prescribed in the Trade Mark Rules. Any request for such extension should be made to the Registrar before the expiry of the sixty (60) day statutory period.

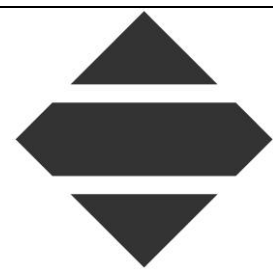

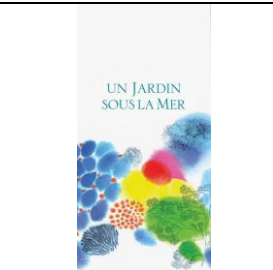

All the details of the marks advertised herein are available on WIPO's website www.wipo.int/romarin

2. African Regional Intellectual Property Organization (ARIPO)

ARIPO is a regional body established by African governments to have a central office to among other things, process and grant industrial property rights on behalf of member states. ARIPO grants patents, utility models and industrial designs on behalf of Kenya. Currently, ARIPO consists of the following 16 member states; Botswana, Gambia, Ghana, Kenya, Lesotho, Liberia, Malawi, Mozambique, Namibia, Sierra Leone, Sudan, Swaziland, Tanzania, Uganda, Zambia and Zimbabwe. Kenyan applicants are required by law to first file with the Institute before filing with ARIPO. ARIPO secretariat is located in Harare Zimbabwe.

The complete fee schedule for ARIPO is available on their website <http://www.aripo.org>. The following are the fees an applicant is required to pay immediately on application.

3. Patent Cooperation Treaty

The Patent Cooperation Treaty (PCT) is an international patent protection treaty consisting of over 140 member states. PCT is administered by the World Intellectual Property Organization in Geneva Switzerland. PCT makes it possible for an applicant to seek patent protection for an invention simultaneously in any of the selected member states by filing one application. PCT is a filing system and does not grant patents on behalf of the member states. Applications must enter national phase in the selected member states. In the national phase, the applicant is required to pay the prescribed national fees in the said member states. Further, in some member states, a foreign applicant is required to have a resident agent. The PCT fees as of 1st May 2011 are as follows:

Type of fee	Fee		Fee waivers
International filing fee	USD 1, 367 or CHF 1330		90% waiver for a natural person from Kenya
Search fees (only one search authority needs to be selected by applicant)	Austria	USD 2, 443	75% waiver for natural a person from Kenya

6. The International Classification of Goods and Services for the Purposes of the Registration of Marks (Nice Classification)

The Nice Classification is established under the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks, one of the treaties administered by the World Intellectual Property Organization. The Nice Classification was established by an Agreement concluded at a Diplomatic Conference held in Nice on 15th June 1957. Kenya has not ratified the Agreement. However, section 6 of the Trade Marks Act provides that goods and services in respect of which registration of a mark is applied for shall be classified in accordance with the Nice Classification. The following are the class headings under the Nice Classification:
