INID CODES

INID is an acronym for 'Internationally agreed Numbers for the Identification of (bibliographic) Data'. The codes are used on the first page of industrial property documents and in gazettes to identify the bibliographic data without knowledge of the language used and the industrial property laws applied. The following INID codes are used in this Journal:

Standard ST.9 and ST.80 for Patents and utility Models and Industrial Designs

- (11) Number of the document
- (12) Designation of the kind of document

Public Notice

Launch of the Patent Online Filing System

The Institute is pleased to announce a significant milestone in our commitment to enhancing service delivery and embracing digital transformation. This is in line with the Government's digitalization of public services aimed at improving efficiency, accessibility and inclusivity as spelt out under the Bottom-Up Economic Transformation Agenda (BETA)'s 5th core pillar, the Digital Superhighway and Creative Economy.

We have officially launched our new Online Filing System, a secure and user-friendly platform designed to streamline the application process for industrial property (IP) rights.

With this new system, clients can now file and make payments for the following **National Applications** entirely online, from anywhere and at any time: -

- i. Patents
- ii. Industrial Designs; and
- iii. Utility Models

The e-Filing System is expected to bring benefits including 24/7 convenience whereby clients can file their applications outside of the traditional office working hours, ensure faster processing and enhance cost-effectiveness thereby saving on traveling, printing, and physical document handling costs.

The e-filing portal is live and accessible via the KIPi website under e-services menu at (<https://patentonline.kipi.go.ke/efiling/>). Additional information on how to use the e-filing system is available on the Institute's website www.kipi.go.ke.

All clients are encouraged to use this platform. For any assistance, contact us on Tel: **0702002020** and **0736002020** or email ict@kipi.go.ke.

The Institute remains dedicated to fostering innovation and protection of IP in Kenya. The launch of this e-filing system is a testament to our ongoing efforts to modernize our services and better serve you.

We look forward to providing you with a more efficient and modern filing experience.

1.0 PATENT APPLICATIONS PUBLISHED UNDER SECTION 42 AND REGULATION 35.

1.1 National Application

(21) Application no.: KE/P/2023/4687 (22) Filing Date: 14/09/2023(30) Priority: (51) Int.Cl.2018.01 F 03B 1/00(2006.01), F 03B 13/00(2006.01), F 03G 7/00(2006.01), F 15B 21/00(2006.01), F 15B 3/00(2006.01)(54) Title: HYDRAULIC SHOCK GENERATOR(72) Inventors: STEPHEN MUTHOMI MARANGU(73) Applicant(s): STEPHEN MUTHOMI MARANGU P.O. BOX 41430-00100 NAIROBI, Kenya (74) Agent: , (57) The invention relates to the streamlined design of a single chambered shock modulating hydraulic shock generator through the location of the holes, shock dampening mechanisms, and valve that eliminates power losses to shockwave and straight-line movement of a streamline. With flow from an intake hydraulic head through valve initiated, the hydraulic shock generator cycles through its pressure, kinetic, and potential energy states, with a leveraged discharge of kinetic energy flow driven by a shockwave produced. Through conservation of energy, rigid-body computations for one kilo at one-meter head yields 10 joules or watts per cycle. Optimal return is due to optimization through part layout and streamlining for straight line unidirectional movement of the streamline with planer surfaces sharing an origin plane for balanced optimized shock wave control. The invention allows the use of systems with relatively lower head sources of water, thereby increasing power generation potential.

In one embodiment, a wireless device receives a downlink subframe including a downlink control channel from the cellular communications network. The wireless device estimates one or more large-scale channel properties for an antenna port of interest in the downlink control channel based on a subset of reference signals that correspond to antenna ports in the cellular communications network that are quasi co-located with the antenna port of interest with respect to the one or more large scale channel properties. As a result of using the quasi co-located antenna ports, estimation of the one or more large-scale channel properties is substantially improved.

(11) Patent Number: 1074 date of grant: 27/11/2025(21) Application Number: KE/P/2024/5160 (22) Filing Date:18/11/2024 (30) Priority:(73) Owner(s): KRISH PARIKH of P.O BOX +254733718801 NAIROBI, Kenya (72) Inventor(s) AAGAM PARIKH(74) Agent/address for correspondence: (54) Title: UNIQUE PACKAGING WITH ANTICOUNTERFEIT,LOYALTY PROGRM AND TRACEABILITY FEATURES(51) Int.Cl.2018.01: G 06K 19/077(2006.01), G 06Q 30/06(2012.01), G 06Q 20/38(2012.01), B 65D 85/804(2006.01), B 65D 85/00(2006.01) (57) Abstract: The present invention relates to an anticounterfeit and Loyalty-enabled packaging stem designed to authenticate product and enhance consumer engagement. The system incorporates a unique identifier, such as a QR code barcode, or alphanumeric code on each product units packaging. Concealed by a tamper-evident cover, which can be either scratch-off ink or a secure label. upon removal of the cover by the consumer, the identifier is revealed. allowing verification through a mobile app, website or text entry. The system also integrates a loyalty program, which rewards consumers upon successful authentication with points, discounts, or access to promotional offers. This packaging solution deters counterfeiting by making the packaging non-reusable once opened, ensuring that only genuine products reach the consumer. Additionally, an encrypted database may track distribution and authentication events, providing enhanced security and brand control. The invention is applicable across multiple industries, including pharmaceuticals, cosmetics, electronics, and luxury goods, offering a versatile solution for product verification and customer retention

The human PH20 variant contained in the pharmaceutical composition according to the present invention includes an amino acid substitution at one or more positions selected from the alpha helix 8 sequence (S347-C381) and a linkage region (A333-R346) between alpha helix 7 and alpha helix 8 on the wild-type human pH20 having the amino acid sequence of SEQ IS NO: 1, and is optionally cleaved at an amino acid positioned at the N-terminal or C-terminal region. In addition, the pharmaceutical composition according to the present invention may further comprise a pharmaceutically acceptable additive, particularly, a stabilizer. Due to the advantage of the human PH20 variant, the pharmaceutical composition according to the present invention can exhibit a maximum therapeutic effect of the drug used together therewith.

(57) Abstract: Bacterial strain Pseudomonas palmensis BBB001, microorganism of the gram-negative group of bacteria, genus Pseudomonas, stimulator of plant adaptive metabolism against abiotic stress and enhancer of plant nutrition in iron and other nutrients. This strain, isolated from the rhizosphere of Nicotiana glauca, has been characterised from a morphological, biochemical and genetic standpoint by whole-genome sequencing, being identified as a new species, reduces oxidative stress in plants, inducing higher production and improved adaptation to abiotic stress conditions; for example, due to lack of water or high salinity, such that it can be used, alone or in combination with other strains, to increase plant fitness in plant species of agronomic food interest. Furthermore, since it is capable of enhancing iron, phosphorus and potassium nutrition, it can also be used as a biofertiliser, both in organic and conventional agriculture.

A first device determines whether SDT is allowed to be initiated at a first protocol layer of the first device. In accordance with a determination that the SDT is allowed to be initiated at the first protocol layer, the first device determines whether the SDT is allowed to be initiated at a second protocol layer of the first device. In accordance with a determination that the SDT is allowed to be initiated at the second

protocol layer, the first device initiates, via the first protocol layer, a communication procedure for the SDT with a second device. Through this solution, it is possible to avoid unnecessary interactions between protocol layers as well as avoid false resume of the radio bearer when the SDT procedure cannot be performed.

The method implemented at a first device comprises: obtaining first periodicity information indicating a first periodicity. The first periodicity is used by a second device to perform a quality of experience measurement. The method further comprises determining a second periodicity to be used by an AS of the second device to report one or more measurement results of the QoE measurement. The method further also comprises transmitting second periodicity information indicating the second periodicity to the second device. In this way, the first device may be involved in the procedure of configuration and maintaining the QoE measurement. More specifically, the first device may control the interval for reporting oE measurement results.

An outlet (7) from the chamber connects to a network (8) of pipes for local distribution of water. A compression spring (21) acts at its lower end (22) on the top of a diaphragm (19). The upper end (23) of the spring abuts a spring drive member (24) at the end of a drive tube (25) of a servo device (26). The spring drive member can be advanced by a motor to further compress the spring or retracted to relieve compression. Downstream from the outlet (7), the pipework 8 of the local distribution network extends. In it adjacent the outlet is a flow meter (32) and a pressure sensor (33). These are electronically connected to a controller (34). The pressure at the regulator is set based on the measured flow.

The hot air is not recycle, recirculated, or re-cooled. Hot air being expelled from the building creates a pressure differential in which the pressure at the hot side of the building (where the heat containment is located) is lower than the cool side of the building. To this end, a chilling unit is installed at an opening of a building to supply cooled air at a constant rate. The chilling unit does not have an internal controller. Rather, an air conditioning (AC) unit of the building acts as an external controller. The AC unit is be set to maintain a target temperature and only runs when the temperature inside the building is above the target temperature.

The shift away from the use of fossil energy to regenerative energy sources requires a novel energy supply infrastructure. The supply from wind and solar energy as main energy sources does not coincide with the electricity demand in terms of time frame such that the function of storage devices is increasingly important. The universal application method achieves a new level of application quality by virtue of the measures taken, i.e. the storage of fluctuating current supplies with short reaction times in order to adapt the network loads on the basis of a plurality of separately actuatable hub modules so as to use potential energy in a structure while simultaneously doubling the usage of the surface area on the roof by means photovoltaics and/or wind turbines. The application quality consists in the reliable supply of current in an autonomous as well as network-integrated manner in the vicinity of the point of consumption without specific location requirements and with an automatic and reliable operation which can be remote-controlled, high storage and distribution cycles with short reaction times and without self-discharges or degeneration, a low auxiliary energy consumption, low operating costs, a high degree of environmental compatibility with a high degree of efficiency, and a long calendar service life which is conterminous with the building.

It provides a care bundle for the emergency management and prevention of postpartum hemorrhage (PPH) after childbirth. It describes a comprehensive, integrated system that includes pharmaceutical components, medical devices, and diagnostic tools, as well as educational training materials, all designed to systematize and streamline emergency obstetric care for the management of PPH. It comprises a first response bundle including pre-dosed pharmaceutical components comprising oxytocin, misoprostol, and tranexamic acid; medical devices comprising uterine balloon tamponade, Foley catheter with drainage bag,

and non-pneumatic anti-shock garment; a refractory response bundle comprising additional interventions for severe cases, including compression, blood transfusion, and transportation to a higher facility, and a modular packaging system with organized compartments for easy access to each component.

Integrations depends on customized circuitry for receiving, processing and transmitting data to server and to actuator and display of appropriate data by involved parties. The mechanical structure comprises of the feeding channel assembly 15 that feeds ball into Main channel assembly 17 which is pivotally connected to the motor so as to be capable of tilting. The Top Sensor on Top Sensor carrier 18 vertically aligned to bottom sensor attached on balls exit channel 19, senses ball count to determine when a game is complete. Tray front plate 16and Tray back plate 20 supports the assemblies and gives mounting provision of the tray for screwing to the pool table.

The monocular camera captures images of the environment, and the processing module applies artificial intelligence algorithms to generate spatial and descriptive information from two-dimensional input. The audio feedback system provides this information to the user through bone-conduction or in-ear speakers. The glasses further comprise a microphone for voice-command input, optional haptic feedback modules, wireless communication components, and a rechargeable power supply optionally supplemented with solar panels. The invention falls within the field of wearable assistive devices and is principally used for providing visually impaired persons with environmental awareness, object identification, and navigation support.

These modules generate direct current (DC) electricity through the See beck effect. The output is regulated by a DC-DC boost converter with Maximum Power Point Tracking (MPPT) and stored in a lithium-ion battery. A pure sine wave inverter then converts this energy to 240V alternating current (AC)

The microcapsules are substantially spherical, with particle diameters of 5-50 microns and residual moisture content below 5%. Encapsulation significantly enhances anthocyanin stability against light, heat, and oxidative degradation while enabling controlled release during gastrointestinal digestion, thereby improving bioavailability. The encapsulated anthocyanins retain antioxidant activity and exhibit selective cytotoxicity against cancer cell lines, including MCF-7, HeLa, Du145, and Caco-2, with reduced toxicity toward non-cancerous cells. The microcapsules are suitable for incorporation into functional foods, beverages, nutraceuticals, and pharmaceutical formulations. The invention further discloses a method for producing the microcapsules involving extraction, purification, emulsification, and spray-drying of anthocyanins using maltodextrin and gum Arabic as wall materials, providing a stable, bioactive, and health-promoting purple tea derivative.

The production method comprises the following steps: sourcing whole ocean fish, removing intestines, the fish powder with local agricultural ingredients including cassava flour, coconut, ground nuts, cashew, and milk to form a dough; and baking the dough to prepare the nutritionally enhanced fish cookie. According to the production method, the fish is processed with bones intact for retaining essential calcium and omega-3 fatty acids, increasing the product's nutritional density, and providing bone health benefits; the unique blend of ocean-

sourced fish powder and local agricultural ingredients is used for delivering high protein and energy, minimizing fishy taste, and ensuring the product is culturally acceptable; and the final baking process is used for yielding a nutritious, shelf-stable product, facilitating long-term storage, and enabling efficient distribution in public health programs.

7.0 INDUSTRIAL DESIGN APPLICATIONS PUBLISHED UNDER SECTION 87 AND REGULATION 48

NOTICE is given that any person who has grounds of opposition to the Registration of any of the Industrial designs published herein may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form IP 36 (in duplicate) together with a fee of Ksh.5,000/= (local opponent) or US\$ 250 (foreign opponent).

The period of lodging the notice of opposition may be extended by the Managing Director as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Managing Director to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after reasonable notice has been given in writing to the applicant to afford him an opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant. Representations and samples of the designs advertised herein can be seen at the Patent Registry, Kenya Industrial Property Institute, KIPi Centre, 17 Kabarsiran Avenue, Off Waiyaki Way, Lavington, Nairobi.

9.0 TRADE MARKS

9.1 Applications accepted for registration

NOTICE is given that any person who has grounds of opposition to the Registration of any of the trade marks advertised herein according to these classes may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form TM. No. 6 (in duplicate) together with a fee of Ksh.5,000/= (local opponent) or US\$ 250 (foreign opponent). The period of lodging the notice of opposition may be extended by the Registrar as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Registrar to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after a reasonable notice has been given in writing to the applicant for registration to afford him any opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant.

Representations of the marks advertised herein can be seen at the Trade Marks Registry, Kenya Industrial Property Institute, KIPi Centre, Kabarsiran Avenue Off Waiyaki Way, Lavington, Nairobi.

9.7 REMOVAL

Section 23 of the Trade Marks Act provides that registration of a trade mark in Kenya shall expire after a period of **ten (10) years**. The Act also provides that the proprietor of a registered trade mark may make an application for renewal of the trade mark upon completion of the prescribed Form TM 10 and payment of the prescribed renewal fee.

Rule 65 of the Trade Mark Rules provides that where no application for renewal of a registered trade mark is received upon expiry of the ten year period, the Registrar of Trade Marks shall notify the proprietor of this fact. Where no application for renewal of the registered trade mark is received within a period of **sixty (60) days** from the date of the notice for renewal by the Registrar, rule 67 of the Trade Mark Rules requires the Registrar of Trade Marks to publish this fact.

In accordance with the above provisions, the Registrar of Trade Marks hereby notifies the public that the proprietors of the trade marks indicated below were duly notified and that they did not file applications for renewal of their respective trade marks.

In accordance with the provisions of rules 67 and 68 of the Trade Mark Rules, the public is hereby notified as follows:

Where the proprietor of a registered trade mark makes an application for renewal of a mark that has been published herein and pays the renewal fee together with the additional prescribed late renewal fee **within thirty (30) days** from the date of this publication, the trade mark shall be renewed and shall not be removed from the Register of Trade Marks;

Where no application for renewal of a trade mark published herein is received **within thirty (30) days** from the date of this publication, the trade mark shall be forthwith removed from the Register of Trade Marks; and

Once the trade mark is removed from the Register of Trade Marks, the proprietor may thereafter make an application for renewal of the mark upon payment of the prescribed renewal fee together with the additional prescribed restoration fee. The trade mark shall then be restored to the Register of Trade Marks upon the Registrar of Trade Marks being satisfied that it is just to do so and upon imposing such conditions as the Registrar may deem fit.

10.0 MADRID APPLICATIONS ACCEPTED FOR REGISTRATION

The following are the marks whose international registration has been notified to Kenya as a designated contracting Party by the International Bureau, World Intellectual Property Organization (WIPO) and which are governed by the Madrid Agreement and the Madrid Protocol. The prescribed period of twelve (12) months and eighteen months (18) respectively for refusal of the marks commences from the notification date indicated herein for each mark.

NOTICE is given that any person who has grounds of opposition to the registration of any of the marks may, in accordance with the provisions of rule 11(1) of the Trade Marks (International Registration) Rules 2003, file a notice of opposition within sixty (60) days from the date of this Journal on form TM. No. 6 (in duplicate) together with a fee of Ksh 5,000/= (Kenyan residents) or US\$ 250 (non residents).

The period of filing the notice of opposition may be extended by the Registrar of Trade Marks as prescribed in the Trade Mark Rules. Any request for such extension should be made to the Registrar before the expiry of the sixty (60) day statutory period.

All the details of the marks advertised herein are available on WIPO's website www.wipo.int/romarin

2. African Regional Intellectual Property Organization (ARIPO)

ARIPO is a regional body established by African governments to have a central office to among other things, process and grant industrial property rights on behalf of member states. ARIPO grants patents, utility models and industrial designs on behalf of Kenya. Currently, ARIPO consists of the following 16 member states; Botswana, Gambia, Ghana, Kenya, Lesotho, Liberia, Malawi, Mozambique, Namibia Sierra Leone, Sudan, Swaziland, Tanzania, Uganda, Zambia and Zimbabwe. Kenyan applicants are required by law to first file with the Institute before filing with ARIPO. ARIPO secretariat is located in Harare Zimbabwe.

The complete fee schedule for ARIPO is available on their website <http://www.aripo.org>. The following are the fees an applicant is required to pay immediately on application.

3. Patent Cooperation Treaty

The Patent Cooperation Treaty (PCT) is an international patent protection treaty consisting of over 140 member states. PCT is administered by the World Intellectual Property Organization in Geneva Switzerland. PCT makes it possible for an applicant to seek patent protection for an invention simultaneously in any of the selected member states by filing one application. PCT is a filing system and does not grant patents on behalf of the member states. Applications must enter national phase in the selected member states. In the national phase, the applicant is required to pay the prescribed national fees in the said member states. Further, in some member states, a foreign applicant is required to have a resident agent. The PCT fees as of 1st May 2011 are as follows:

Type of fee	Fee	Fee waivers
-------------	-----	-------------

International filing fee	USD 1, 367 or CHF 1330		90% waiver for a natural person from Kenya

6. The International Classification of Goods and Services for the Purposes of the Registration of Marks (Nice Classification)

The Nice Classification is established under the Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks, one of the treaties administered by the World Intellectual Property Organization. The Nice Classification was established by an Agreement concluded at a Diplomatic Conference held in Nice on 15th June 1957. Kenya has not ratified the Agreement. However, section 6 of the Trade Marks Act provides that goods and services in respect of which registration of a mark is applied for shall be classified in accordance with the Nice Classification. The following are the class headings under the Nice Classification:
