EDITORIAL

The Industrial Property Journal is the Official Journal of the Kenya Industrial Property Institute. Publication of the Journal is provided for under the Industrial Property Act, 2001 and regulation 7 of the Industrial Property Regulations 2002. The Journal is published monthly by the Institute as part of the procedures for protection of industrial property rights under the Industrial Property Act, No. 3 of 2001 and the Trade Marks Act, Cap 506 of the Laws of Kenya.

Public Notice

Launch of the Patent Online Filing System

The Institute is pleased to announce a significant milestone in our commitment to enhancing service delivery and embracing digital transformation. This is in line with the Government's digitalization of public services aimed at improving efficiency, accessibility and inclusivity as spelt out under the Bottom-Up Economic Transformation Agenda (BETA)'s 5th core pillar, the Digital Superhighway and Creative Economy.

We have officially launched our new Online Filing System, a secure and user-friendly platform designed to streamline the application process for industrial property (IP) rights.

With this new system, clients can now file and make payments for the following **National Applications** entirely online, from anywhere and at any time: -

- i. Patents
- ii. Industrial Designs; and
- iii. Utility Models

The e-Filing System is expected to bring benefits including 24/7 convenience whereby clients can file their applications outside of the traditional office working hours, ensure faster processing and enhance cost-effectiveness thereby saving on traveling, printing, and physical document handling costs.

The e-filing portal is live and accessible via the KIPI website under e-services menu at (<https://patentonline.kipi.go.ke/efiling/>). Additional information on how to use the e-filing system is available on the Institute's website www.kipi.go.ke.

All clients are encouraged to use this platform. For any assistance, contact us on Tel: **0702002020** and **0736002020** or email ict@kipi.go.ke.

The Institute remains dedicated to fostering innovation and protection of IP in Kenya. The launch of this e-filing system is a testament to our ongoing efforts to modernize our services and better serve you.

We look forward to providing you with a more efficient and modern filing experience.

(11) Patent Number: 8076 date of grant: 14/01/2026(21) Application Number: 2017/9928 (22) Filing Date: 12/11/2015(30) Priority:2014904547 12/11/2014 AU (73) Owner(s): GLOBALTECH CORPORATION PTY LTD of 1/48 Vinnicombe Drive, Canning Vale, Western Australia 6155, Australia, Australia (72) Inventor(s) (74) Agent/Address for service: GALLOWAY & COMPANY, P O Box A761, Avondale, Harare, Zimbabwe(54) Title: APPARATUS AND METHOD FOR MEASURING DRILLING PARAMETERS OF A DOWN - THE -HOLE DRILLING OPERATION FOR MINERAL EXPLORATION(51) Int.Cl.: E 21B 10/00, E 21B 47/12, E 21B 47/00 (57) Abstract: Apparatus 100 for measuring drilling parameters of a down-the-hole drilling operation for mineral exploration includes a module 10.1 mounted in-line with a drill string 110 and proximate to a drill bit 120. The drill string 110 is rotated and progressed down the hole. The module 10 has sensors for sensing conditions. The apparatus 100 measures drilling parameters based on the sensed conditions. The measured data is logged in the module 10 and then transmitted to a computer for a drilling operator's use. The drilling operator monitors progress and optimises performance of the drilling operation based on the measured data. Measurement of drilling parameters based on sensed data proximate to the drill bit enables accurate determination of actual WOB, torque and RPM fluctuations, axial vibration, radial vibration, temperature, RPM. A second module 10.2 is mounted in-line with the same drill string 110 but away from the drill bit 120. The second module 10.2 measures the same drilling parameters as the module 10.1 proximate to the drill bit 120. The driller is provided with the data recorded by the second module 10.2 to judge the performance of the drilling operation. Comparing drilling parameters based on sensed data proximate to the drill bit and distal to the drill bit enables accurate determination of vertical

drag/resistance of the drill string 110 within the hole, rotational resistance of the drill string 110, degree of wind-up of the drill string 110 and presence of stick-slip conditions at lower end of the drill string 110.

The invention also provides transgenic plants, plant cells, plant parts, and seeds comprising the novel synthetic Intergenic Sequence Regions. The invention also provides methods to reduce the interaction between transgene expression cassettes using the novel synthetic Intergenic Sequence Regions.

A protective sleeve (28) encloses the cap well (20) except for that portion of the cap well, the active portion (20d), which encloses the explosive end

section (24a) of detonator (24). The protective sleeve serves to attenuate the force of shock waves from nearby prior explosions acting on the detonator (24). An annular air space (32) may be provided between protective sleeve (28) and cap well (20) to further attenuate the force of such shock waves. Attenuation of the shock waves reduces the likely- hood of damage to detonators (24) by prior nearby explosions.

A terminal device performs beam failure detection on a first number of serving cells configured for the terminal device. The terminal device determines information to at least indicate respective results of the beam failure detection on a second number of serving cells among the first number of serving cells, where the second number is smaller than the first number. The determined information is transmitted by the terminal device to a network device serving the terminal device using a resource allocated for the terminal device. Based on the information, the network device determines an overall result of the beam failure detection performed on the first number of serving cells.

Int.Cl.: H 04W 74/00 (57) Abstract: Embodiments of the present disclosure relate to devices, methods, apparatuses and computer readable storage media of contention resolution for the NTN. The method comprises determining whether an event has occurred, the event comprising a transmission of a message associated with a random access procedure has been performed after a previous transmission of the message, or an uplink grant associated with the message has been received after the previous transmission; and determining a contention resolution failure based on the determination on the event when a timer for monitoring a downlink control channel between a second device and the first device is expired. In this way, the issue of false declaration of contention resolution failure upon contention resolution timer expiry can be solved and the network blind scheduling for MSG3 retransmission can be achieved.

The apparatus includes a configuration receiving component for receiving configuration of the apparatus to monitor a synchronisation event selected from: a time-based event; and, an operation based event. The apparatus includes a configuring component for configuring the apparatus to monitor the selected synchronisation event. The apparatus includes an occurrence detecting component for detecting occurrence of the synchronisation event and a synchronisation information transmitting component for, in response to detecting occurrence of the synchronisation event, transmitting synchronisation information usable for time synchronisation by another apparatus. A system including a number of apparatuses is also provided.

The cookstove features a mechanically designed system of straight and/or angular vents that direct airflow within the structure to support an integrated external cooling mechanism. The cookstove includes a partially and/or closed airflow design that channels air through the combustion chamber, creating a natural draft suction effect that improves combustion and regulates cooking power. The cookstove is constructed using heat-resistant and non-ceramic materials to improve product longevity while reducing health risks to the user.

It relates to the field of organic waste management and feed production. The unit comprises of an internal chamber for batch processing over a 10 to 14-day insect feeding cycle and an external ventilation system designed to direct ammonia and other gases away from the user area. The unit is modular, scalable and portable, and can be manufactured in size variants capable of processing approximately 12 tons, 6 tons, 1.6 tons or 200 kilograms per cycle. The portability of the unit allows for on-site deployment at waste generation locations, minimizing infrastructure requirements. The invention is primarily intended for agricultural use, particularly by

smallholder farmers, to facilitate efficient and sustainable organic waste recycling and livestock feed production

The assembly, comprises a body that holds a frame that has a bottom plate, three stands fixed on the body, two handles welded onto the body frame, three pot rest assembly fixed onto the liner sub-assembly designed to host char or charcoal and an ash door sub-assembly (latch) bearing a latch holder, wherein the said stove is an improved ceramic insulation cook stove. The invention can be used in both charcoal and briquettes as fuel renewable energy for environmental conservation and waste management.

The system integrates unique QR codes, artificial intelligence (AI), and cloud computing for layered 2verification of authenticity and quality. Each QR code encodes manufacturer identifiers, product or batch information, manufacture and expiry dates, and country of origin. A mobile e application scans and decodes the QR code, sending it to a central server for verification against stored data. Results are displayed visually (PASS/FAIL) or symbolically (-/ / X), optionally with an audio prompt. The system operates across three levels - consumer, wholesale/retail, and border/port enhancing transparency, traceability, and anti-counterfeiting in supply chains

The system integrates mobile money platforms such as M-PESA and Airtel Money for initiating game access through mobile transactions. A microcontroller manages payment data processing, real-time transaction verification, and operation of a servo-driven mechanism that releases the pool balls upon confirmed payment. The system includes an LCD screen and keypad for presenting payment instructions, and wireless communication capability for transmitting and validating transaction information. An administrative interface is included for configuring pricing, setting payment account details, and accessing transaction records.

The system comprises a rolling machine with a coiled spring, a set of pulleys, linkages, a crane and crane handle, and a pair of right-angled triangular stopper blocks connected by a square tube. Actuation of the crane handle deploys the stopper blocks downward toward the vehicle tyres through coordinated movement of the pulleys and linkages. The stopper blocks engage the tyres externally to prevent forward or backward movement. When the crane handle is released, the rolling machine retracts the stopper blocks to their storage position. The system provides an auxiliary mechanical braking mechanism independent of the vehicle's internal braking system and is adaptable for installation on various vehicle types

The process blends MgO, magnesium chloride, perlite, wood fiber, and fiberglass mesh. The methodology begins with a controlled blending of magnesium oxide (MgO) and magnesium chloride (MgCh), along with carefully proportioned additives such as perlite, wood fiber, and fiberglass mesh. The curing phase involves optimized temperature, humidity, and optional low-pressure steam treatment.

Each module is constructed with pre-engineered wall, roof, and floor panels that incorporate integrated channels for utilities such as electrical wiring, plumbing, and HV AC systems. The process uses interchangeable, reinforced panels for configurations and reassembly for various housing layouts. These panels are manufactured using a combination of steel framing and composite materials. Each component is pre-finished and equipped with interlocking joints. Additionally, the process includes a modular foundation system making this housing suitable for both permanent and temporary applications.

These modules generate direct current (DC) electricity through the Seebeck effect. The output is regulated by a DC-DC boost converter with Maximum Power Point Tracking (MPPT) and stored in a lithium-ion battery. A pure sine wave inverter then converts this energy to 240V alternating current (AC)

The system integrates mobile money platforms such as M-PESA and Airtel Money for initiating game access through mobile transactions. A microcontroller manages payment data processing, real-time transaction verification, and operation of a servo-driven mechanism that releases the pool balls upon confirmed payment. The system includes an LCD screen and keypad for presenting payment instructions, and wireless communication capability for transmitting and validating transaction information. An administrative interface is included for configuring pricing, setting payment account details, and accessing transaction records.

The system comprises a rolling machine with a coiled spring, a set of pulleys, linkages, a crane and crane handle, and a pair of right-angled triangular stopper blocks connected by a square tube. Actuation of the crane handle deploys the stopper blocks downward toward the vehicle tyres through coordinated movement of the pulleys and linkages. The stopper blocks engage the tyres externally to prevent forward or backward movement. When the crane handle is released, the rolling machine retracts the stopper blocks to their storage position. The system provides an auxiliary mechanical braking mechanism independent of the vehicle's internal braking system and is adaptable for installation on various vehicle types

NH263 owns the biometric electronic switching platform which allows service providers to send real-time electronic claims to Medical Aids. System Functionalities The following modules are functional and are fully developed in our system: • Membership and Biometrics Module - this module allows the Provider to check validity and status of the member in real-time without having to call the Medical Aid. The system will show paid up or terminated members. By use of biometrics the provider will be able to check if the member is the bonafide card holder which eliminates fraud at the point of care. • Claims Transaction Switching Module - This module allows Providers to send real time claims to the medical aid eliminating the lengthy process of paper claims. • Claims Capture Module - Providers who do not have practice management systems can use this platform to send electronic claims using our online web capture portal. • Document Management (Digital Document Filing) attaching supporting document to a claim like a prescription or laboratory request form. This allows for more information to be shared with the Medical Aid if required. • Correspondence and Communications Module - this allows Funders to send information to Providers instantly like remittance advices. • Electronic Remittance Advise - This allows for the Funder to send remittance advices in electronic format that will go straight into the Provider's system allowing for allocations of the payments done by Funder instantly and giving exception reports of rejections. • Authorisations Module - Instead of calling the funder for authorisations, the Provider can request for authorisations in real time before rendering services.

7.0 INDUSTRIAL DESIGN APPLICATIONS PUBLISHED UNDER SECTION 87 AND REGULATION 48

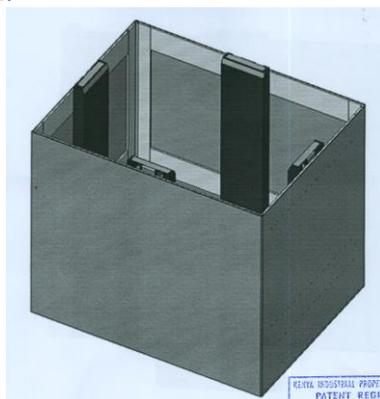

NOTICE is given that any person who has grounds of opposition to the Registration of any of the Industrial designs published herein may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form IP 36 (in duplicate) together with a fee of Ksh.5,000/= (local opponent) or US\$ 250 (foreign opponent).

The period of lodging the notice of opposition may be extended by the Managing Director as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Managing Director to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after reasonable notice has been given in writing to the applicant to afford him an opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant. Representations and samples of the designs advertised herein can be seen at the Patent Registry, Kenya Industrial Property Institute, KIPi Centre, 17 Kabarsiran Avenue, Off Waiyaki Way, Lavington, Nairobi.

9.0 TRADE MARKS

9.1 APPLICATIONS ACCEPTED FOR REGISTRATION

NOTICE is given that any person who has grounds of opposition to the Registration of any of the trade marks advertised herein according to these classes may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form TM. No. 6 (in duplicate) together with a fee of Ksh.5,000/= (local opponent) or US\$ 250 (foreign opponent). The period of lodging the notice of opposition may be extended by the Registrar as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Registrar to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after a reasonable notice has been given in writing to the applicant for registration to afford him any opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant.

Representations of the marks advertised herein can be seen at the Trade Marks Registry, Kenya Industrial Property Institute, KIPi Centre, Kabarsiran Avenue Off Waiyaki Way, Lavington, Nairobi.

9.7 REMOVAL

Section 23 of the Trade Marks Act provides that registration of a trade mark in Kenya shall expire after a period of **ten (10) years**. The Act also provides that the proprietor of a registered trade mark may make an application for renewal of the trade mark upon completion of the prescribed Form TM 10 and payment of the prescribed renewal fee.

Rule 65 of the Trade Mark Rules provides that where no application for renewal of a registered trade mark is received upon expiry of the ten year period, the Registrar of Trade Marks shall notify the proprietor of this fact. Where no application for renewal of the registered trade mark is received within a period of **sixty (60) days** from the date of the notice for renewal by the Registrar, rule 67 of the Trade Mark Rules requires the Registrar of Trade Marks to publish this fact.

In accordance with the above provisions, the Registrar of Trade Marks hereby notifies the public that the proprietors of the trade marks indicated below were duly notified and that they did not file applications for renewal of their respective trade marks.

In accordance with the provisions of rules 67 and 68 of the Trade Mark Rules, the public is hereby notified as follows:

Where the proprietor of a registered trade mark makes an application for renewal of a mark that has been published herein and pays the renewal fee together with the additional prescribed late renewal fee **within thirty (30) days** from the date of this publication, the trade mark shall be renewed and shall not be removed from the Register of Trade Marks;

Where no application for renewal of a trade mark published herein is received **within thirty (30) days** from the date of this publication, the trade mark shall be forthwith removed from the Register of Trade Marks; and

Once the trade mark is removed from the Register of Trade Marks, the proprietor may thereafter make an application for renewal of the mark upon payment of the prescribed renewal fee together with the additional prescribed restoration fee. The trade mark shall then be restored to the Register of Trade Marks upon the Registrar of Trade Marks being satisfied that it is just to do so and upon imposing such conditions as the Registrar may deem fit.

10.0 MADRID APPLICATIONS ACCEPTED FOR REGISTRATION

The following are the marks whose international registration has been notified to Kenya as a designated contracting Party by the International Bureau, World Intellectual Property Organization (WIPO) and which are governed by the Madrid Agreement and the Madrid Protocol. The prescribed period of twelve (12) months and eighteen months (18) respectively for refusal of the marks commences from the notification date indicated herein for each mark.

NOTICE is given that any person who has grounds of opposition to the registration of any of the marks may, in accordance with the provisions of rule 11(1) of the Trade Marks (International Registration) Rules 2003, file a notice of opposition within sixty (60) days from the date of this Journal on form TM. No. 6 (in duplicate) together with a fee of Ksh 5,000/= (Kenyan residents) or US\$ 250 (non residents).

The period of filing the notice of opposition may be extended by the Registrar of Trade Marks as prescribed in the Trade Mark Rules. Any request for such extension should be made to the Registrar before the expiry of the sixty (60) day statutory period.

All the details of the marks advertised herein are available on WIPO's website www.wipo.int/romarin

3. Patent Cooperation Treaty

The Patent Cooperation Treaty (PCT) is an international patent protection treaty consisting of over 140 member states. PCT is administered by the World Intellectual Property Organization in Geneva Switzerland. PCT makes it possible for an applicant to seek patent protection for an invention simultaneously in any of the selected member states by filing one application. PCT is a filing system and does not grant patents on behalf of the member states. Applications must enter national phase in the selected member states. In the national phase, the applicant is required to pay the prescribed national fees in the said member states. Further, in

some member states, a foreign applicant is required to have a resident agent. The PCT fees as of 1st May 2011 are as follows:

Type of fee	Fee		Fee waivers
International filing fee	USD 1, 367 or CHF 1330		90% waiver for a natural person from Kenya
Search fees (only one search authority needs to be selected by applicant)	Austria	USD 2, 443	75% waiver for natural a person from Kenya
