GENERAL NOTICES

24th November, 2025**Public Notice****Launch of the Patent Online Filing System**

The Institute is pleased to announce a significant milestone in our commitment to enhancing service delivery and embracing digital transformation. This is in line with the Government's digitalization of public services aimed at improving efficiency, accessibility and inclusivity as spelt out under the Bottom-Up Economic Transformation Agenda (BETA)'s 5th core pillar, the Digital Superhighway and Creative Economy.

We have officially launched our new Online Filing System, a secure and user-friendly platform designed to streamline the application process for industrial property (IP) rights.

With this new system, clients can now file and make payments for the following **National Applications** entirely online, from anywhere and at any time: -

- i. Patents
- ii. Industrial Designs; and
- iii. Utility Models

The e-Filing System is expected to bring benefits including 24/7 convenience whereby clients can file their applications outside of the traditional office working hours, ensure faster processing and enhance cost-effectiveness thereby saving on traveling, printing, and physical document handling costs.

The e-filing portal is live and accessible via the KIPi website under e-services menu at (<https://patentonline.kipi.go.ke/efiling/>). Additional information on how to use the e-filing system is available on the Institute's website www.kipi.go.ke.

All clients are encouraged to use this platform. For any assistance, contact us on Tel: 0702002020 and 0736002020 or email ict@kipi.go.ke.

The Institute remains dedicated to fostering innovation and protection of IP in Kenya. The launch of this e-filing system is a testament to our ongoing efforts to modernize our services and better serve you.

We look forward to providing you with a more efficient and modern filing experience.

John Onyango
Managing Director

(73) Applicant(s): VALORIE AMONDI BUYUFREDRICK MOKORO MONARI 57103 - 00100 NAIROBI, Kenya and 55374 - 00200, Kenya

(74) Agent: ,

(57) A steam inhalation composition consisting of Himalayan salt, Epsom salt, white salt, mint leaves, rosemary powder, eucalyptus leaves, holy basil leaves, lemongrass leaves, and essential oils of thyme, peppermint, and eucalyptus. This composition is used in steam inhalation therapy to relieve nasal congestion, support respiratory health, and detoxify the skin. It is free from synthetic additives and fragrances, making it an eco-friendly alternative to other wellness products. The composition may also be used as a dry air freshener to release a soothing aroma into the surrounding environment.

(74) Agent: Godfrey Noel,

(57) A computer implemented system for agricultural carbon credit generation and management comprising a multi-channel access layer including a low connectivity interface (2) for basic mobile phones, native mobile applications (3), and a web-based interface (5), all connected to a cloud- hosted backend platform. The system comprises a dual layer verification engine (6) configured to receive farmer reported agricultural practice data and to validate the data using automated analysis of satellite imagery, Internet of Things soil sensor measurements (9), and machine learning models (10), generating a verification confidence score (11). Verified practices result in carbon credit units recorded in digital climate wallets (12). The system includes an integrated marketplace (16) enabling listing, matching via a matching engine (17), and transfer of verified carbon credits through escrow-based settlement (18), and an integration layer (19) for synchronisation with external registries and reporting systems Safestay, Limuru Rd, 321, Nairobi

(74) Agent: Yvonne Omollo,

(57) A system and method for facilitating proximity-based financial transactions between mobile computing devices using Bluetooth Low Energy (BLE) device discovery and identity resolution are disclosed. A payer device performs a BLE scan to detect advertisement signals transmitted by one or more nearby devices. Device-associated identifiers extracted from the detected signals are transmitted to a transaction server, which resolves the identifiers to corresponding registered user accounts stored in a database. Resolved user information is returned to the payer device and presented for recipient selection. Upon receipt of transaction details and successful authentication, the transaction server executes a transfer of funds between accounts associated with the payer and selected payee. (72) Inventors: KEGANDA IAN MAYAKA

(73) Applicant(s): KEGANDA IAN MAYAKA P.O. BOX 4112-00100 NAIROBI, Kenya

(74) Agent: ,

(57) A Remote GPS-Enabled Locking Fuel Cap System for securing fuel tanks across automobiles, motorcycles, trucks, and generators. The Device integrates nanoelectromechanical hardened-steel locking bolt and spring actuator, operated via three independent channels: an AES-128 encrypted radio-frequency key fob, a companion mobile application (iOS/Android) operating over Bluetooth Low Energy and cellular relay, and onboard GPS geofencing logic enabling location-based automatic lock/unlock rules. When locked the cap sits flush with the fuel tank neck; upon receiving an authenticated unlock signal the spring actuator retracts the bolt and the pop-up lid rises. The cap body features a slip-free, anti-torque exterior surface resistant to forced removal. An onboard tamper detection subsystem triggers audible alerts and mobile push notifications upon detecting unauthorized manipulation. The electronics module and rechargeable lithium-ion battery are housed within the sealed pop-up section. Universal adapter rings enable fitment across standard fuel neck diameters. The invention provides a proactive, multi-channel, self-contained fuel security solution requiring no vehicle wiring modification

(72) Inventors: AWORI RYAN MUSUMBA

(73) Applicant(s): AWORI RYAN MUSUMBA AWORI STEPHANIE KAGONYA P.O BOX 19301 - 00100, Kenya and P.O BOX 19301 - 00100, Kenya

(74) Agent:

(57) In view of exacerbating antimicrobial resistance, more therapies based on bacteriophages and phage tail-like structures are under development due to their inherent precise target-binding mechanism conferred to them by tail fibre and spike proteins. A challenge in developing these therapies is the lack of programmable methods of modification of natural tail fibre proteins to henceforth target a particular disease-cause microorganism. This invention seeks to solve this through the quick, *in silico* identification of short tail fibre protein sequences (three to nine amino acid residues long) that directly determine the cellular targets of corresponding bacteriophages or phage tail-like structures. It is primarily useful for drug-developers of phage-based therapies who seek to repurpose natural bacteriophages or phage tail-like structures into an antimicrobial agent against a selected pathogen

BOX 54708-00200, NAIROBI (57) Disclosed in the present invention is a method for the efficient extraction of high-purity α -chitin and its subsequent transformation into chitosan from black soldier fly (*Hermetia illucens*) pupal exuviae (puparia). The method emphasizes a sustainable, chemical, or biological hybrid approach to remove proteins, minerals, and pigments to produce high-value chitosan. The method includes producing insect-based chitin and chitosan of interest by (a) cultivating Black soldier fly pupae exuviae using a consortium of bacteria wherein (i) green technology practices are observed (ii) sustainability is guaranteed, (iii) alcohol as a fermentation by-product (ethanol) is obtained, (iv) approximately 10 % of chitosan transformed from chitin, and (b) characterization of the chitosan bio-polymer achieved

(51) Int.Cl.2025.01: G 06Q 30/0251(20230101)

(57) Abstract: some aspects thereof, the present disclosure describes a targeted advertising system that utilizes sequential data enrichment, multi-channel distribution, dynamic cohort creation, and machine learning-driven ad content and distribution adaptation. The system dynamically generates user cohorts based on ad suitability and continuously adapts ad content and distribution parameters to maximize relevance and effectiveness. The system receives an advertisement with content for distribution and determines a suitable user cohort to receive the advertisement. The machine learning models then adjust the ad parameters, including distribution parameters and content, based on the suitability of the user cohort audience. The adapted advertisement is distributed to the users, and the system infers a user cohort based on the adjusted advertisement content for continuous optimization.

(51) Int.Cl.2018.01: G 06F 7/00(2006.01), G 06T 17/00(2006.01)

(57) Abstract:

System and Method for Converting Geospatial Zipped Keyhole Markup Language (KMZ) Data into Simulation-Ready mathematical model in a high-level numerical computing environment for power system simulation of an Electrical Distribution Network. A system and method for converting Zipped Keyhole Markup Language (KMZ) data to a simulation-ready model of an electrical distribution network. The system parses Zipped Keyhole Markup Language (KMZ) geospatial data, classifies network components using metadata-driven rules, and algorithmically heals topological gaps to produce a digital model. The system generates mathematical models for power flow analysis from existing GIS data for network planning and diagnostics.

The system comprises a plurality of sensors to sense the agriculture activities and environment parameters to generate sensor data. A transceiver presents in the system transfer the sensor data to the server. The server comprises a activity detection module to detect the agriculture activities performed by an individual. A monitoring feedback generator to generate a monitoring feedback based on detected activity. A remote training module determines a performance score of the activity performed by the individual and sends training feedback to the individual based on the performance score.

The platform features a polynucleotide gene regulation cassette that is placed in the target gene and includes a synthetic riboswitch positioned in the context of a 5' intron-alternative exon-3' intron. The riboswitch comprises an effector region and a sensor region (e.g., an aptamer that binds a small molecule ligand) such that the alternative exon is spliced into the target gene mRNA when the ligand is not present thereby preventing expression of the target gene. When the ligand is present, the alternative exon is not spliced into the target gene mRNA thereby providing expression of the target gene.

Box GP 2319, Accra, Ghana(54) Title: GRINDING ROLL(51) Int.Cl.: B 02C 4/30 (57) Abstract: The present disclosure relates to a grinding roll comprising a roll body having a cylindrical outer surface extending axially between a pair of opposite ends, and a side groove formed at each end of the roll body, the side groove including a support shoulder recessed from the cylindrical outer surface and/or from surfaces of the opposite ends of the roll body. The grinding roll further comprises an edge ring including a plurality of spaced receiving cavities, and a plurality of wear members, each wear member being received and retained in at least one of the receiving cavities of the edge ring. The wear members are positioned along the edge ring to define an edge of the grinding roll, and the edge ring is received within each side groove. The plurality of wear members is arranged to provide a wear protecting surface which is angled in relation to the cylindrical outer surface of the roll body. Providing an angled wear protecting surface prevents excessive build-up of material on the grinding roll and reduces the need for maintenance. A grinding assembly and an edge ring segment providing improved wear protection are also disclosed.

The device includes a delivery tube having a distal end designed to enter the tumor, and defining an internal channel and an elongate applicator carrying one or more radiotherapy seeds each having a length of at least 1 millimeter, the applicator passing through the internal channel of the delivery tube. When a distal end of the elongate applicator is near a distal end of the delivery tube, it assumes an angle relative to an axis of the delivery tube, such that seeds ejected from the elongate applicator enter the tumor at an angle relative to the axis of the delivery tube.

The electricity storage-type charging device comprises: a charge object connection unit; a high-current dischargeable built-in lithium-ion battery satisfying a high-current discharging specification; a compatible battery detection/switching unit; and a high-current passable current output path. The compatible battery detection/switching unit is provided in the high-current passable current output path. When detecting connection of a high-current chargeable driving lithium-ion battery satisfying an in-use maximum voltage specification and a high-current charging specification to the charge object connection unit, the compatible battery detection/switching unit turns on to allow a high current to pass through the high-current passable current output path without the intervention of a voltage converter so that the high-current chargeable driving lithium-ion battery can be charged with a high current output from the high-current dischargeable built-in lithium-ion battery. The high current is a current corresponding to a rate of 10 C or higher with respect to a charging capacity of 2.5 Ah.

A method performed by a policy control entity comprises setting a validity time for a radio access technology or frequency selection priority (RFSP) index for a User Equipment (UE) moving from the first network to a second network. The method further comprises sending a first message comprising the RFSP index and the validity time for the RFSP index to a mobility management entity in the first network. The validity time for the RFSP index indicates a time by which the RFSP index will be used in the second mobility management entity while the UE is in the second network.

The terminal device determines a first threshold duration for first information for uplink synchronization and a second threshold duration for second information for the uplink synchronization; and performs a first procedure for updating the first information and a second procedure for updating the second information based on: determining that a validity duration of one piece of information expires and a remaining validity duration of the other piece of information is shorter than corresponding threshold duration. As such, the two procedures updating the first information and the second information may be aligned with each other, thus the complexity can be reduced, the power consumption can be reduced, and the communication efficiency may be improved.

(57) A herbivore dentition model for interactive educational use comprises a rigid panel shaped to represent the mouth of a plant-eating animal, featuring a simplified anatomical arrangement of incisors, premolars, molars, a horny pad, and a diastema. Permanent magnets are embedded into the panel at each respective tooth position and the horny pad. The model further includes metallised name tags corresponding to each anatomical feature, adapted for removable magnetic attachment to the embedded magnets. The visual aid allows users to interactively place and remove labels without damaging the panel to understand spatial dental arrangements and plant-processing adaptations in herbivores.

The aerosol provides effective pest control against a wide range of insects such as flies, mosquitoes and other related insects such as arthropods encountered in domestic, commercial, agricultural, horticultural, animal dwelling spaces and relevant environments. The system is designed for convenient and precise application using pressurized containers equipped with valve systems for controlled release. The broad-spectrum activity, long-lasting residual effectiveness, and emphasis on safety and environmental sustainability and offers valuable solutions for integrated pest management across various sectors

(72) (74) (54) AUTOMATED GEO-BASED LOGISTICS CONTROL SYSTEM FOR MUNICIPAL WASTE COLLECTION

(51) G 01C 21/34(2006.01)

(57) An automated geo-based logistics control system for municipal waste collection is disclosed. The system comprises a central processing unit, a distributed database, and mobile nodes equipped with geolocation modules. The system processes real-time spatial data to allocate tasks using a proximity-based algorithm. A state-machine control mechanism ensures that task activation occurs only upon receipt of a verified confirmation signal. The system synchronizes digital system states with physical waste collection operations, thereby improving efficiency and data integrity.

(54) Title: METHOD AND COMPOSITION FOR NATURALLY PRESERVED OIL-FREE CEREAL FOOD WITH DUAL BARRIER STABILIZATION

(57) The invention discloses a method and composition for preparing a shelf-stable, ready-to-eat cereal food using a dual-barrier preservation system, avoiding synthetic preservatives. The method comprises: conditioning and milling maize; extended natural fermentation (24 to 40 hours) to achieve a stable pH range of 3.5 to 4.2; a

subsequent oil-free thermal dehydration step designed to achieve >80% lipase enzyme inactivation; and a final drying step to reduce the Water Activity (C_{aw}) to < 0.60. The final product is a nutrient-dense powder with a shelf life exceeding 18 months, serving as an ideal carrier for micronutrient supplementation in humanitarian aid.

(54) Title: HYBRID SOLAR POWERED BOAT SYSTEM

(57) A hybrid solar-powered boat where solar energy is captured by the photovoltaic panels (4) which is mounted on the canopy of the hull (1) and converted into direct current (DC) electricity. The charge controller (5) regulates the power input to the battery bank (3), preventing overcharging and ensuring stable voltage levels. The stored power is supplied to the electric motor (6), which provides propulsion to the vessel. The control console (2) allows the operator to select between full-electric or hybrid propulsion modes depending on power availability and desired performance. The hybrid solar powered boat can also be charged via a shore-solar array (9) fixed on a shore based solar charging facility (10). In hybrid operation, the Internal Combustion Engine (ICE) (7) may directly drive the propeller shaft or act as a generator to maintain charge within the battery system.

(54) Title: MULTISYSTEM FOOD DEHYDRATOR

(57) The multisystem food dehydrator is a form of technology that is used to dry various agricultural products using: Indirect sun drying, solar assisted drying and electricity. Dehydration preserves food and adds value by eliminating water from substances and reducing their weight. These enables easy storage due to reduction in volume of agricultural products and increases their usability. The cost of storage is lowered, packaging is improved and transportation becomes cheaper. The innovation runs on the following principle: retention of energy in the dark (black) chamber, controlled temperature, air outlet through vents on the sides of the dehydrator. The system entails: The sunlight hitting the box keeps the inner parts warmed hence dehydrating the food substances. The fan quickens the drying process and enables hot moisture evaporation by creating the density differential. The light through the glass top and door is converted to heat through the black surfaces. Both conventions (natural and forced) heat up the food substances leading to effective dehydration. Different foods dehydrate at different temperatures due to different moisture content levels and hence the need for measuring the temperatures.

8.0 INDUSTRIAL DESIGN APPLICATIONS PUBLISHED UNDER SECTION 87 AND REGULATION 48

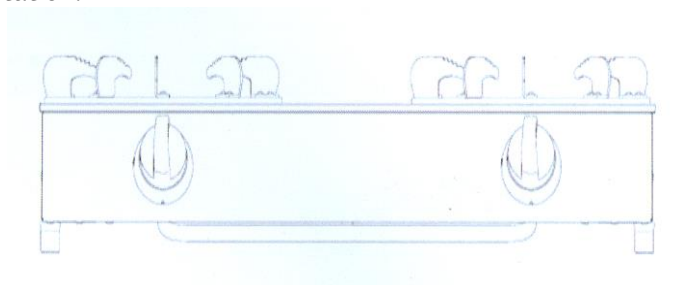

NOTICE is given that any person who has grounds of opposition to the Registration of any of the Industrial designs published herein may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form IP 36 (in duplicate) together with a fee of Ksh.5,000/= (local opponent) or US\$ 250 (foreign opponent).

The period of lodging the notice of opposition may be extended by the Managing Director as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Managing Director to reach him before the expiry of the period allowed.

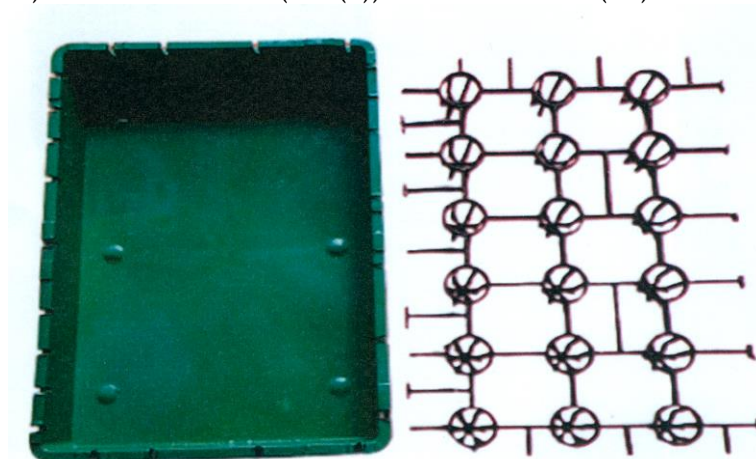

Formal opposition should not be lodged until after reasonable notice has been given in writing to the applicant to afford him an opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant. Representations and samples of the designs advertised herein can be seen at the Patent Registry, Kenya Industrial Property Institute, KIPi Centre, 17 Kabarsiran Avenue, Off Waiyaki Way, Lavington, Nairobi.

11.8 REMOVAL

Section 23 of the Trade Marks Act provides that registration of a trade mark in Kenya shall expire after a period of **ten (10) years**. The Act also provides that the proprietor of a registered trade mark may make an application for renewal of the trade mark upon completion of the prescribed Form TM 10 and payment of the prescribed renewal fee.

Rule 65 of the Trade Mark Rules provides that where no application for renewal of a registered trade mark is received upon expiry of the ten year period, the Registrar of Trade Marks shall notify the proprietor of this fact. Where no application for renewal of the registered trade mark is received within a period of **sixty (60) days** from the date of the notice for renewal by the Registrar, rule 67 of the Trade Mark Rules requires the Registrar of Trade Marks to publish this fact.

In accordance with the above provisions, the Registrar of Trade Marks hereby notifies the public that the proprietors of the trade marks indicated below were duly notified and that they did not file applications for renewal of their respective trade marks.

In accordance with the provisions of rules 67 and 68 of the Trade Mark Rules, the public is hereby notified as follows:

- (a) Where the proprietor of a registered trade mark makes an application for renewal of a mark that has been published herein and pays the renewal fee together with the additional prescribed late renewal fee **within thirty (30) days** from the date of this publication, the trade mark shall be renewed and shall not be removed from the Register of Trade Marks;
- (b) Where no application for renewal of a trade mark published herein is received **within thirty (30) days** from the date of this publication, the trade mark shall be forthwith removed from the Register of Trade Marks; and

Once the trade mark is removed from the Register of Trade Marks, the proprietor may thereafter make an application for renewal of the mark upon payment of the prescribed renewal fee together with the additional prescribed restoration fee. The trade mark shall then be restored to the Register of Trade Marks upon the Registrar of Trade Marks being satisfied that it is just to do so and upon imposing such conditions as the Registrar may deem fit.

11.9 MADRID APPLICATIONS ACCEPTED FOR REGISTRATION

The following are the marks whose international registration has been notified to Kenya as a designated contracting Party by the International Bureau, World Intellectual Property Organization (WIPO) and which are governed by the Madrid Agreement and the Madrid Protocol. The prescribed period of twelve (12) months and eighteen months (18) respectively for refusal of the marks commences from the notification date indicated herein for each mark.

NOTICE is given that any person who has grounds of opposition to the registration of any of the marks may, in accordance with the provisions of rule 11(1) of the Trade Marks (International Registration) Rules 2003, file a notice of opposition within sixty (60) days from the date of this Journal on form TM. No. 6 (in duplicate) together with a fee of Ksh 5,000/= (Kenyan residents) or US\$ 250 (non residents).

The period of filing the notice of opposition may be extended by the Registrar of Trade Marks as prescribed in the Trade Mark Rules. Any request for such extension should be made to the Registrar before the expiry of the sixty (60) day statutory period.

All the details of the marks advertised herein are available on WIPO's website www.wipo.int/romarin
