GENERAL NOTICES

24th November, 2025**Public Notice****Launch of the Patent Online Filing System**

The Institute is pleased to announce a significant milestone in our commitment to enhancing service delivery and embracing digital transformation. This is in line with the Government's digitalization of public services aimed at improving efficiency, accessibility and inclusivity as spelt out under the Bottom-Up Economic Transformation Agenda (BETA)'s 5th core pillar, the Digital Superhighway and Creative Economy.

We have officially launched our new Online Filing System, a secure and user-friendly platform designed to streamline the application process for industrial property (IP) rights.

With this new system, clients can now file and make payments for the following **National Applications** entirely online, from anywhere and at any time: -

- i. Patents
- ii. Industrial Designs; and
- iii. Utility Models

The e-Filing System is expected to bring benefits including 24/7 convenience whereby clients can file their applications outside of the traditional office working hours, ensure faster processing and enhance cost-effectiveness thereby saving on traveling, printing, and physical document handling costs.

The e-filing portal is live and accessible via the KIPi website under e-services menu at (<https://patentonline.kipi.go.ke/efiling/>). Additional information on how to use the e-filing system is available on the Institute's website www.kipi.go.ke.

All clients are encouraged to use this platform. For any assistance, contact us on Tel: 0702002020 and 0736002020 or email ict@kipi.go.ke.

The Institute remains dedicated to fostering innovation and protection of IP in Kenya. The launch of this e-filing system is a testament to our ongoing efforts to modernize our services and better serve you.

We look forward to providing you with a more efficient and modern filing experience.

John Onyango
Managing Director

(54) Title: IMUNICIPAL WASTE SYNGAS GENERATION SYSTEM

(72) Inventors: FIDELIS MUNENE

(73) Applicant(s): FIDELIS MUNENE P.O. BOX 460-60200 MERU, Kenya

(74) Agent:

(57) A municipal waste syngas generation system and method for processing municipal solid waste is disclosed. The invention comprises an integrated waste-heat drying subsystem, a mechanical inert separation subsystem, a primary rotary kiln steam reformer, an additive injection arrangement, a secondary catalytic reformer, a syngas cooling and heat recovery circuit, and a residue stabilization section. Waste heat recovered from the syngas cooling circuit is utilized to reduce moisture content of incoming municipal solid waste prior to reforming. Mechanical separation removes abrasive inert materials to minimize equipment wear. A secondary catalytic reformer containing a coking-resistant perovskite-supported catalyst enhances tar cracking and improves hydrogen-rich syngas production. Controlled injection of fluxing agents and halogen-capturing compounds stabilizes heavy metals and promotes vitrification of solid residues, thereby reducing environmental leachability. The integrated system improves thermal efficiency, enhances syngas quality, reduces tar formation, protects reforming equipment, and provides environmentally safer residue management for heterogeneous municipal solid waste streams.

(74) Agent: JOHN KHAYEGA CHIVAI,

(57) The invention relates to a ballistic armour vest comprising an outer carrier formed from high-strength, water- and abrasion- resistant fabric and configured to accommodate front and back ballistic panels within its internal pockets for secure positioning. The vest includes adjustable fastening elements configured to enable fit adjustment and facilitate donning and removal. A modular attachment system is also provided for integration of external accessories. Soft armour panels comprise aramid and ultra-high molecular weight polyethylene fibers configured to provide handgun threat protection, while hard armour panels comprise metallic and composite materials configured to provide rifle threat protection. The vest is arranged to support multiple protection levels through interchangeable configurations. Testing conducted in accordance with National Institute of Justice standards demonstrates resistance to specified projectiles and deformation within prescribed limits. KCKC ADVOCATES LLP. P.O. (57): The objective of the invention is to provide a system, a method and an apparatus for increasing the efficiency of equipment cost of the whole core network in a mobile communication system, thereby reducing the cost. A core network comprises, as nodes for managing the mobility of a terminal, a plurality of nodes having different functions of services to be provided to the terminal. A node which is to be connected to the terminal is selected, on the basis of subscriber information and terminal information, on the core network side in accordance with a service characteristic to be used by the terminal or in accordance with a terminal type, whereby the terminal and the selected node are connected.

(54) Title: DOUBLE FLASH STEAM CYCLE MODEL FOR A GEOTHERMAL WELLHEAD POWER PLANT

(51) Int.Cl.2016.01: F 01K 17/00

(57) Abstract: The present invention relates to a method of addressing a challenge and utilize existing resource exhaustively, this invention optimizes the efficiency of the plant by introducing a second stage flashing that will produce low pressure steam. The low pressure steam will be used to run the gas extraction system leaving the high pressure steam to entirely run the high pressure. In cycle, the Wellhead power plants uses the steam from a single stage flashing of the geothermal fluid. The steam is used for power generation but part of it is used as motive steam for gas extraction system. The single well concept presents a new challenge where decline in output of wells results to a decline in plant power output. The excess of the low pressure steam will be used to run a low pressure turbine generating extra power. This will improve the overall energy that will be recovered from the well. The well discharge and steam venting vessel here in referred to as the silencer will also be modified to make it easy to maintain.

(54) Title: SYSTEM AND METHOD FOR AUTHENTICATION AND ASSOCIATION OF MULTI-PLATFORM ACCOUNTS

(51) Int.Cl.:

(57) Abstract: The present invention concerns the verification and authentication of independent digital wallets and, particularly, the linking of regulated and unregulated digital wallets on a public blockchain. An unregulated trading system has a public certificate module arranged selectively to write NFTs into specific unregulated accounts. A public ledger database of the blockchain system stores unregulated accounts which each contain: (i) a document type identifier having a related minted unique non-transferable NFT linked to an externally generated certificate hash and where each non-transferable NFT is obtained via writing of a smart contract and each non-transferable NFT is a permanent record for a description of the document type; and (ii) a link to a private wallet of a regulated account of a regulated trading platform. The link relates directly to the minted nontransferable NFT issued from the certificate module. Each non-transferable NFT is configured to be changed or moved from the unregulated wallet only through an interaction that directly involves the certificate module.

(51) Int.Cl.: A 61B 5/16, A 61B 5/00

(57) Abstract: The invention relates to a software-based diagnostic tool, a method for operating same, and a diagnostic system for use in diagnosing a chronic neurological disorder such as autism in both children and adults. The diagnostic tool comprises a speech analysis module (21) for identifying characteristic values (28) of a vocal biomarker in a speech signal (26) of a subject (11), at least one further module (22, 23) for identifying characteristic values (30, 32) of a second biomarker, and an evaluation unit (25) connected downstream thereof. The speech analysis module (21) comprises: a speech-signal-triggering controller (21a) which displays image data on an image display device (7) in order to trigger at least one speech signal (26) in the subject (11); a speech recording unit (21b) which records the speech signal (26); and a speech signal analyzer (21c) which subsequently evaluates the speech signal (26) to determine first at what point in time which pitch level is present, and subsequently determines a frequency distribution of the pitch levels among a number of frequency bands of a selected frequency spectrum, with this frequency distribution forming the characteristic values (28) of the vocal biomarker. On the basis of the characteristic values (28, 30, 32) of the biomarkers, the evaluation unit (25) determines, by applying a machine learning algorithm and comparison with a multi-dimensional interface, whether the subject (11) has the chronic neurological disorder.

 (54) Title: INTEGRATION OF HIGH FREQUENCY RECONSTRUCTION TECHNIQUES WITH REDUCED POST-PROCESSING DELAY
 (51) Int.Cl.: G 10L 19/18, G 10L 21/038, G 10L 21/02
 (57) Abstract: A method for decoding an encoded audio bitstream is disclosed. The method includes receiving the encoded audio bitstream and decoding the audio data to generate a decoded low band audio signal. The method further includes extracting high frequency reconstruction metadata and filtering the decoded low band audio signal with an analysis filter bank to generate a filtered low band audio signal. The method also includes extracting a flag indicating whether either spectral translation or harmonic transposition is to be performed on the audio data and regenerating a high band portion of the audio signal using the filtered low band audio signal and the high frequency reconstruction metadata in accordance with the flag. The high frequency regeneration is performed as a post-processing operation with a delay of 3010 samples per audio channel.

(54) Title: LAYERED CODING FOR COMPRESSED SOUND OR SOUND FIELD REPRESENTATIONS

(51) Int.Cl.: G 10L 19/008

(57) Abstract: The present document relates to a method of layered encoding of a compressed sound representation of a sound or sound field. The compressed sound representation comprises a basic compressed sound representation comprising a plurality of components, basic side information for decoding the basic compressed sound representation to a basic reconstructed sound representation of the sound or sound field, and enhancement side information including parameters for improving the basic reconstructed sound representation. The method comprises sub-dividing the plurality of components into a plurality of groups of components and assigning each of the plurality of groups to a respective one of a plurality of hierarchical layers, the number of groups corresponding to the number of layers, and the plurality of layers including a base layer and one or more hierarchical enhancement layers, adding the basic side information to the base layer, and determining a plurality of portions of enhancement side information from the enhancement side information and assigning each of the plurality of portions of enhancement side information to a respective one of the plurality of layers, wherein each portion of enhancement side information includes parameters for improving a reconstructed sound representation obtainable from data included in the respective layer and any layers lower than the respective layer. The document further relates to a method of decoding a compressed sound representation of a sound or sound field, wherein the compressed sound representation is encoded in a plurality of hierarchical layers that include a base layer and one or more hierarchical enhancement layers, as well as to an encoder and a decoder for layered coding of a compressed sound representation.

(51) Int.Cl.: H 04N 19/11, H 04N 19/136, H 04N 19/96, H 04N 19/196, H 04N 19/176

(57) Abstract: Provided is a picture encoding device that divides a picture into blocks and performs encoding for each of the divided blocks. A primary signal block divider (101) divides a primary signal of the picture into rectangles having a predetermined size, and generates a primary signal block. A secondary signal block divider (101) divides a secondary signal of the picture into rectangles having a predetermined size, and generates a secondary signal block. A primary signal predictor (102) predicts a primary signal, and a secondary signal predictor (102) predicts a secondary signal. The secondary signal predictor (102) can perform inter prediction of predicting a secondary signal from an encoded primary signal, and the inter prediction is restricted based on at least one of a size of the primary signal block and a size of the secondary signal block.

The assembly, comprises a body that holds a frame that has a bottom plate, three stands fixed on the body, two handles welded onto the body frame, three pot rest assembly fixed onto the liner sub-assembly designed to host char or charcoal and an ash door sub-assembly (latch) bearing a latch holder, wherein the said

stove is an improved ceramic insulation cook stove. The invention can be used in both charcoal and briquettes as fuel renewable energy for environmental conservation and waste management.

A solar photovoltaic charging input optionally charges the battery in either configuration. A curriculum-agnostic uploadable content store is configurable for any national or international curriculum framework by substituting the content bundle without modification to the core application. A hardware remote control device is the sole and exclusive navigation mechanism without touchscreen, keyboard, or mouse. A lesson picker interface navigable exclusively via the hardware remote control presents hierarchical curriculum selection. Lesson slides display full-screen with a persistent curriculum lesson identifier overlay. Pre-stored interactive activities operate without internet or student devices. An over-the-air mechanism downloads content updates when connectivity is available. The combination enables a teacher with no technology training to deliver curriculum-aligned lessons in any classroom without internet, without mains power, and without technology skills beyond a remote control

(57) A reusable menstrual undergarment comprises a breathable garment body incorporating body-responsive tailoring, an absorbent assembly positioned within a central gusset region, and a suspension loop for suspending the garment adjacent a bathing area. The garment may be formed from a breathable cotton-blend fabric for everyday use or from a cotton terry cloth fabric for post-bath use, wherein the terry cloth fabric absorbs moisture from the user's skin while the absorbent assembly captures menstrual discharge. The undergarment may further be provided in everyday, active-use, lightweight liner, and post-bath transitional configurations. The reusable construction enables repeated laundering while maintaining menstrual protection, thereby providing an environmentally sustainable alternative to disposable menstrual hygiene products.

(57) An integrated, solar-autonomous environmental monitoring system [106] and method for real-time tracking of grain storage conditions, inventory volume, and biological degradation risks within a grain silo. The device consolidates a co-sampled, six-parameter sensing array within a single ruggedized enclosure [106], comprising an NDIR Carbon dioxide sensor [110], an electrochemical Oxygen sensor [111], a multi-drop 1-Wire vertical temperature probe string [114], a digital relative humidity sensor [112], a capacitive analog grain moisture sensor [116], and an apex-mounted ultrasonic distance sensor [118]. Operating on a low-power duty cycle managed by an ESP32-S3 microcontroller unit [800], the system is powered by an MPPT solar charge controller [400] and battery arrangement [104]. Synchronized telemetry is transmitted via an EG915NEAAC cellular module [700] using an MQTT protocol to a cloud broker [124] for predictive risk analytics, automated decision support, and alert generation. An onboard wireless transceiver [120] executes a captive portal interface for toolless field provisioning.

automated agreement generation, and digital evidence management. The system authenticates users, verifies property listings, enables secure communication between transaction parties, records electronic payment information, and automatically generates legally admissible digital evidence comprising user identities, communication records, transaction histories, timestamps, location information, and electronic agreements.

(54) Title: ADSORBENT (SILICA MOLYBDATE) FOR REMOVAL OF PHOSPHATES FROM WATER

(57) Pollution by phosphates affect aquatic life as they have side effects even at very low concentrations. Silica molybdate is prepared by first chlorinating silica sand using phosphorous pentachloride to give chlorinated silica which is aminated using ethylenediamine and thereafter treated with sodium molybdate. The molecular structure of the silica molybdate was characterized using Fourier Transform Infrared (FT-IR). FT-IR results showed Adsorption bands at 854cm⁻¹ and 542cm⁻¹ which were attributed to Mo=O and Mo-O stretching in molybdate. Peaks observed at 1388 and 1662cm⁻¹ were attributed with the vibration mode of Mo-OH bond and bending mode of adsorbed water. Spectra peaks observed at 542, 634.58 and 898.97 cm⁻¹ were attributed to the adsorption of molybdate. The physical adsorption parameters which were examined using batch adsorption system were; temperature, pH, contact, time, initial concentration using sorption models, adsorption kinetics and thermodynamics. Results showed that optimum pH for biosorption of P042⁻ was 6.0, optimal contact time was 30 minutes, optimum temperature was 45°C. The experimental results obtained showed that the maximum phosphate adsorption of silica molybdate at optimum conditions was found to be 94.73% in water.

This invention relates to a QR Code Based Smart Anti-Counterfeit and Quality Validation AI System for authentication and validation of products, goods, and services. The system integrates unique QR codes, artificial intelligence (AI), and cloud computing for layered 2verification of authenticity and quality. Each QR code encodes manufacturer identifiers, product or batch information, manufacture and expiry dates, and country of origin. A mobile application scans and decodes the QR code, sending it to a central server for verification against stored data. Results are displayed visually (PASS/FAIL) or symbolically (,f / X), optionally with an audio prompt. The system operates across three levels - consumer, wholesale / retail, and border/port -enhancing transparency, traceability, and anti-counterfeiting in supply chains

 (54) Title: NATURAL PLANT COLOR PALETTE FOR ARTISTIC PAINTING MEDIA
 (57) The invention provides a color palette comprising natural plant pigments, a method extracting natural plant pigment and utilization of pigment as painting media for creating painting. Pigments are extracted from selected plant materials, including beetroot, turmeric, tea, henna, red pepper, 5 tomato, coffee, and cinnamon. The method combines a soaking extraction process that involves heating, immersion in water or alcohol, fragmenting, and squeezing and a sonication extraction method using Soxhlet, Ultra-sonication equipment and extraction solvents. This dual process yields pigments with enhanced vibrancy and improved stability compared to traditional methods. Extracted pigments are stored in airtight containers under cool, dry, and light-protected conditions 10 to prevent degradation. Testing of extracted pigments is done on various surfaces with different binders to assess performance and compatibility. The pigments are formulated into a color palette arranged in a color wheel to provide a broad range of hues for artistic applications.

 (54) Title: A LEARNING MODEL APPARATUS FOR TEACHING THE EXCRETORY SYSTEM
 (57) An anatomical learning apparatus is disclosed for teaching the distributed human excretory system. The apparatus comprises a physical model representing key excretory organs (Kidneys, Liver, Lungs, Skin) and a set of name tags. The model integrates embedded first magnetic components, such as permanent magnets or ferromagnetic receivers, discretely positioned at each organ. Each name tag acts as a second magnetic component, bearing the name of an organ and adapted to magnetically couple with its corresponding region. This design facilitates an interactive, tactile, and repeatable method for identification and assessment, enhancing kinaesthetic learning by providing secure and reversible attachment of the labels across the distributed organs of the system.

(54) Title: MODEL OF THE MOUTH (TEETH) FOR PERSONAL HYGIENE EDUCATION

(57) An interactive, physical educational anatomical model of the human mouth and a method for its use are disclosed, designed for teaching dental anatomy and promoting personal oral hygiene. The utility model comprises a durable, rigid body panel manufactured from plastic, polymer board, wood, or composite materials, shaped or printed to represent the human oral cavity including the upper and lower jaws. Permanent magnets are embedded within or beneath the panel at predetermined anatomical positions corresponding to the tongue and specific tooth types, namely the incisors, canines, premolars, and molars. A accompanying set of labeled, free-moving name tags fabricated from metal-coated plastic or lightweight metal is provided. These tags are configured to magnetically attach to the corresponding embedded magnets on the panel. Upon manual application by learners, the model provides an engaging, tactile, and repeatable pedagogical tool that visually and physically reinforces the spatial arrangement and functionality of teeth. The configuration enables autonomous identification and labeling of dental structures during classroom instruction, overcoming the limitations of passive charts and diagrams while minimizing component wear over its service life.

(57) An interactive menstruation cycle educational model is disclosed, comprising a rigid body panel depicting the female reproductive system and a magnetic identification system. The panel includes anatomical representations of the ovaries, fallopian tubes, uterus, cervix, and birth canal. A plurality of magnets are embedded at predetermined anatomical positions beneath the panel surface. A corresponding set of metallic or metallized name tags is provided, configured to magnetically attach to the panel to facilitate the identification of reproductive organs. In a preferred embodiment, the model includes a movable ovum element capable of being repositioned along the fallopian tube pathway to demonstrate the biological process of ovulation. The model provides a durable, tactile teaching aid that enhances learner engagement and spatial comprehension of the reproductive system through hands-on interaction, overcoming the limitations of static diagrams and charts.

(57) A herbivore dentition model for interactive educational use comprises a rigid panel shaped to represent the mouth of a plant-eating animal, featuring a simplified anatomical arrangement of incisors, premolars, molars, a horny pad, and a diastema. Permanent magnets are embedded into the panel at each respective

tooth position and the horny pad. The model further includes metallised name tags corresponding to each anatomical feature, adapted for removable magnetic attachment to the embedded magnets. The visual aid allows users to interactively place and remove labels without damaging the panel to understand spatial dental arrangements and plant-processing adaptations in herbivores.

(54) Title: method for processing avocado oil residues into stabilised solid bio-fuels and products thereof.

(57) A method for the conversion of high-moisture avocado oil processing residues into stabilized, industrial-grade solid biofuels. The invention involves a stabilization process that reduces the moisture content of avocado pits, skins, and pulp to a level sufficient to inhibit microbial decomposition and enzymatic oxidation. The resulting desiccated material is processed into various physical formats-including loose sludge, pulverized powder, chunks, and densified pellets or briquettes-tailored for specific industrial combustion systems. These formats allow for the direct or co-fired replacement of fossil fuels in high-heat applications such as cementkilns, ceramic factories, and industrial boilers. The invention simultaneously addresses the environmental challenges of organic waste disposal while providing a renewable, high-calorific energy source for local industries.

(57) An offline curriculum delivery system for a classroom display device operates without mains electrical supply at the point of instruction via either an internally integrated rechargeable battery or an externally coupled rechargeable battery pack rechargeable from any available power source at any location and transported to the classroom for use where no mains supply is present. A solar photovoltaic charging input optionally charges the battery in either configuration. A curriculum agnostic uploadable content store is configurable for any national or international curriculum framework by substituting the content bundle without modification to the core application. A hardware remote control device is the sole and exclusive navigation mechanism without touchscreen, keyboard, or mouse. A lesson picker interface navigable exclusively via the hardware remote control presents hierarchical curriculum selection. Lesson slides display full-screen with a persistent curriculum lesson identifier overlay. Pre-stored interactive activities operate without internet or student devices. An over-the-air mechanism downloads content updates when connectivity is available. The combination enables a teacher with no technology training to deliver curriculum aligned lessons in any classroom without internet, without mains power, and without technology skills beyond a remote control

11.0 TRADE MARKS

11.1 Applications accepted for registration

NOTICE is given that any person who has grounds of opposition to the Registration of any of the trade marks advertised herein according to these classes may within sixty (60) days from the date of this Journal, lodge a notice of opposition on form TM. No. 6 (in duplicate) together with a fee of Ksh.5,000/= (local opponent) or US\$ 250 (foreign opponent). The period of lodging the notice of opposition may be extended by the Registrar as he deems fit and upon such terms as he may direct. Any request for such extension should be made to the Registrar to reach him before the expiry of the period allowed.

Formal opposition should not be lodged until after a reasonable notice has been given in writing to the applicant for registration to afford him any opportunity of withdrawing his application before the expense of preparing the notice of opposition is incurred. Failure to give such notice will be taken into account in considering any application by an opponent for an order for costs if the opposition is uncontested by the applicant.

Representations of the marks advertised herein can be seen at the Trade Marks Registry, Kenya Industrial Property Institute, KIPi Centre, Kabarsiran Avenue Off Waiyaki Way, Lavington, Nairobi.

11.8 REMOVAL

Section 23 of the Trade Marks Act provides that registration of a trade mark in Kenya shall expire after a period of **ten (10) years**. The Act also provides that the proprietor of a registered trade mark may make an application for renewal of the trade mark upon completion of the prescribed Form TM 10 and payment of the prescribed renewal fee.

Rule 65 of the Trade Mark Rules provides that where no application for renewal of a registered trade mark is received upon expiry of the ten year period, the Registrar of Trade Marks shall notify the proprietor of this fact. Where no application for renewal of the registered trade mark is received within a period of **sixty (60) days** from the date of the notice for renewal by the Registrar, rule 67 of the Trade Mark Rules requires the Registrar of Trade Marks to publish this fact.

In accordance with the above provisions, the Registrar of Trade Marks hereby notifies the public that the proprietors of the trade marks indicated below were duly notified and that they did not file applications for renewal of their respective trade marks.

In accordance with the provisions of rules 67 and 68 of the Trade Mark Rules, the public is hereby notified as follows:

- (a) Where the proprietor of a registered trade mark makes an application for renewal of a mark that has been published herein and pays the renewal fee together with the additional prescribed late renewal fee **within thirty (30) days** from the date of this publication, the trade mark shall be renewed and shall not

be removed from the Register of Trade Marks;

- (b) Where no application for renewal of a trade mark published herein is received **within thirty (30) days** from the date of this publication, the trade mark shall be forthwith removed from the Register of Trade Marks; and

Once the trade mark is removed from the Register of Trade Marks, the proprietor may thereafter make an application for renewal of the mark upon payment of the prescribed renewal fee together with the additional prescribed restoration fee. The trade mark shall then be restored to the Register of Trade Marks upon the Registrar of Trade Marks being satisfied that it is just to do so and upon imposing such conditions as the Registrar may deem fit.

11.9 MADRID APPLICATIONS ACCEPTED FOR REGISTRATION

The following are the marks whose international registration has been notified to Kenya as a designated contracting Party by the International Bureau, World Intellectual Property Organization (WIPO) and which are governed by the Madrid Agreement and the Madrid Protocol. The prescribed period of twelve (12) months and eighteen months (18) respectively for refusal of the marks commences from the notification date indicated herein for each mark.

NOTICE is given that any person who has grounds of opposition to the registration of any of the marks may, in accordance with the provisions of rule 11(1) of the Trade Marks (International Registration) Rules 2003, file a notice of opposition within sixty (60) days from the date of this Journal on form TM. No. 6 (in duplicate) together with a fee of Ksh 5,000/= (Kenyan residents) or US\$ 250 (non residents).

The period of filing the notice of opposition may be extended by the Registrar of Trade Marks as prescribed in the Trade Mark Rules. Any request for such extension should be made to the Registrar before the expiry of the sixty (60) day statutory period.

All the details of the marks advertised herein are available on WIPO's website www.wipo.int/romarin

2. African Regional Intellectual Property Organization (ARIPO)

ARIPO is a regional body established by African governments to have a central office to among other things, process and grant industrial property rights on behalf of member states. ARIPO grants patents, utility models and industrial designs on behalf of Kenya. Currently, ARIPO consists of the following 16 member states; Botswana, Gambia, Ghana, Kenya, Lesotho, Liberia, Malawi, Mozambique, Namibia Sierra Leone, Sudan, Swaziland, Tanzania, Uganda, Zambia and Zimbabwe. Kenyan applicants are required by law to first file with the Institute before filing with ARIPO. ARIPO secretariat is located in Harare Zimbabwe.

The complete fee schedule for ARIPO is available on their website <http://www.aripo.org>. The following are the fees an applicant is required to pay immediately on application.

3. Patent Cooperation Treaty

The Patent Cooperation Treaty (PCT) is an international patent protection treaty consisting of over 140 member states. PCT is administered by the World Intellectual Property Organization in Geneva Switzerland. PCT makes it possible for an applicant to seek patent protection for an invention simultaneously in any of the selected member states by filing one application. PCT is a filing system and does not grant patents on behalf of the member states. Applications must enter national phase in the selected member states. In the national phase, the applicant is required to pay the prescribed national fees in the said member states. Further, in

some member states, a foreign applicant is required to have a resident agent. The PCT fees as of 1st May 2011 are as follows:

Type of fee	Fee		Fee waivers
International filing fee	USD 1, 367 or CHF 1330		90% waiver for a natural person from Kenya
Search fees (only one search authority needs to be selected by applicant)	Austria	USD 2, 443	75% waiver for natural a person from Kenya
